# Subject Index

- Abduction, hip
  - hip flexion—abduction to elicit asterix in unresponsive patients (Noda et al), 96
- Acetylcholine receptor
  - monoclonal antibodies to acetylcholine receptor secreted by human  $\times$  human hybridomas derived from lymphocytes of a patient with myasthenia gravis (Blair et al), 120A
- Acquired immune deficiency syndrome
  - acute inflammatory demyelinating polyneuropathy in the acquired immune deficiency syndrome (Mishra et al), 131A
  - cytomegalovirus and herpes simplex virus ascending myelitis in a patient with acquired immune deficiency syndrome (Tucker et al), 74
  - neuromuscular complications in association with acquired immune deficiency syndrome (Simpson et al), 160A
  - primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 140A
  - recovery of herpesviruses from cerebrospinal fluid of immunodeficient homosexual men (Dix et al), 611
- Acquired immune deficiency syndrome, childhood
  - neurological complications in infants and children with acquired immune deficiency syndrome (Belman et al), 560
- Acquired immune deficiency syndrome encephalopathy
  - acquired immune deficiency syndrome encephalopathy: some speculations on the pathophysiology (Kairam et al), 390A
- Acyl coenzyme A
  - citrate synthase inhibition by acyl coenzyme A esters (Evangelou et al), 383A
- Adoptive cell transfer
  - adoptive transfer of experimental allergic encephalomyelitis in PL/J mice (Cross et al), 133A
- Adrenal hyperplasia, congenital
  - hormonal effects on handedness: leftward bias among females with congenital adrenal hyperplasia (Nass et al), 416A
- Adrenocorticotrophic hormone
  - acute improvement in exacerbating multiple sclerosis produced by intravenous administration of mannitol (Stefoski et al), 443
- Adrenoleukodystrophy
  - identification of the inflammatory cells in the central nervous system of patients with adrenoleukodystrophy (Griffin et al), 660
  - immunosuppressive therapy in adrenoleukodystrophy (Moser et al), 398A
- Aging
  - central reaction time in normal aging (Smith et al), 145A
- Aging, premature
  - amyotrophic lateral sclerosis: part 2. etiopathogenesis (Tandan and Bradley), NEUROLOGICAL PROGRESS, 419
- Aging and posture
  - postural stability—effect of normal aging (Glatt et al), 136A
- Agnosia, visual
  - the inferior longitudinal fasciculus: a reexamination in humans and monkeys (Tusa and Ungerleider), 583
- Akathisia
  - opioid responsiveness of neuroleptic-induced akathisia (Walters et al), 137A
  - propranolol-induced tardive dyskinesia in a patient with akathisia (Sandyk), LETTER, 370
- Alcoholism
  - case-control study of alcoholic cerebellar degeneration (Estrin), 144A
- Allele Pim3
  - $\alpha$ -1 antitrypsin phenotypes in demyelinating disease: an association between demyelinating disease and the allele Pim3 (McCombe et al), 514
- Aluminum encephalopathy
  - ultrastructural study of Purkinje cell degeneration in aluminum encephalopathy (Ghetti et al), 143A
- Aluminum intoxication
  - phosphorylated neurofilaments in neurons in aluminum intoxication (Troncoso et al), 149A
- Alzheimer's disease
  - Alzheimer's disease: no alteration in the physical state of erythrocyte membrane glycoconjugates (Butterfield et al), LETTER, 105
  - Alzheimer's disease: saccadic eye movement dysfunction (Fletcher and Sharpe), 142A
  - the cholinergic drug RS 86 does not change cerebral blood flow in patients with Alzheimer's disease (Naber et al), 146A
  - clinical history, brain metabolism, and neuropsychological function in Alzheimer's disease (Cutler et al), 298
  - cortical cholinergic innervation (Mesulam et al), 118A
  - intracytoplasmic aluminum accumulation in neurofibrillary tangle-bearing neurons: detection by laser microprobe mass analyzer (Perl et al), 143A
  - psychosis in patients with dementia of the Alzheimer type (Mayeux et al), 144A
  - reductions in nicotinic but not muscarinic cholinergic receptors in Alzheimer's disease measured using [ $^3$ H]acetylcholine (Whitehouse et al), 145A
  - somatostatin-like immunoreactivity in Alzheimer's disease (Beal et al), 144A
  - vasopressin in postmortem Alzheimer brain (Mazurek et al), 143A
- Amaurosis fugax
  - comparison of amaurosis fugax and transient cerebral ischemia: a prospective clinical and arteriographic study (Hurwitz et al), 698
- Amino acids, dicarboxylic
  - serum dicarboxylic acids as uncouplers in Reye's syndrome (Tonsgard and Getz), 383A
- Aminopyridine
  - 4-aminopyridine improves clinical signs in multiple sclerosis (Stefoski et al), 131A
- Amitriptyline
  - acute effects of antidepressants on hippocampal seizures (Clifford et al), 692
- Amnesia
  - bilateral and limited amygdalohippocampal lesions causing a pure amnesic syndrome (Duyckaerts et al), 314
- Amnesia, global
  - transient global amnesia: a case-control study (Kushner and Hauser), 684
- Amnesia, transient
  - transient global amnesia: a case-control study (Kushner and Hauser), 684

- Amygdaloid body**  
bilateral and limited amygdalohippocampal lesions causing a pure amnesic syndrome (Duyckaerts et al), 314
- Amyotrophic lateral sclerosis**  
abnormal glutamate metabolism in amyotrophic lateral sclerosis (Platakis and Carosco), 161A  
amyotrophic lateral sclerosis: part 1. clinical features, pathology, and ethical issues in management (Tandan and Bradley), *NEUROLOGICAL PROGRESS*, 271  
amyotrophic lateral sclerosis: part 2. etiopathogenesis (Tandan and Bradley), *NEUROLOGICAL PROGRESS*, 419  
amyotrophic lateral sclerosis with partial  $\beta$ -hexosaminidase deficiency (Cashman et al), 157A  
composite measures (megascopes) for amyotrophic lateral sclerosis (Finison et al), 157A  
detection of picornavirus sequences in nervous tissue of amyotrophic lateral sclerosis and control patients (Brahic et al), 337  
the effects of TRH on F waves recorded from antagonistic muscles in human subjects (Delwaide and Schoenen), *LETTER*, 366  
ganglioside patterns in amyotrophic lateral sclerosis brain regions (Rapport et al), 60  
intracytoplasmic aluminum accumulation in neurofibrillary tangle-bearing neurons: detection by laser microprobe mass analyzer (Perl et al), 143A  
the natural history of amyotrophic lateral sclerosis (Munsat et al), 157A  
plasminogen activator and basement membrane degradation in denervated muscle: possible role as negative trophic factor in amyotrophic lateral sclerosis (Festoff et al), 159A  
randomized parallel placebo-controlled pilot study of intravenous thyrotropin-releasing hormone administration in amyotrophic lateral sclerosis patients: increased strength and functional ability (Brooks et al), 160A
- Aneurysm, intracranial**  
volume depletion and natriuresis in patients with a ruptured intracranial aneurysm (Wijedicks et al), 211
- Aneurysm, ruptured**  
atypical features of subarachnoid hemorrhage (Adams et al), 123A
- Angiitis, central nervous system**  
isolated angiitis of the central nervous system (Craven and French), 263
- Angiitis, cerebral**  
chickenpox with delayed contralateral hemiparesis caused by cerebral angiitis (Kamholz and Tremblay), 358
- Angiopathy, hemorrhagic cerebral amyloid**  
leukoencephalopathy in diffuse hemorrhagic cerebral amyloid angiopathy (Gray et al), 54
- Angiopathy, necrotizing**  
the clinical spectrum of necrotizing angiopathy of the peripheral nervous system (Kissel et al), 251
- Anhidrosis**  
chronic idiopathic anhidrosis (Low et al), 344
- Anomalies, cortical**  
developmental dyslexia: four consecutive patients with cortical anomalies (Galaburda et al), 222
- Anoxia, cerebral**  
prognostic value of serial somatosensory and brainstem auditory evoked potentials in cerebral anoxia (Potolicchio), 121A
- Anterior horn cells**  
sea-blue histiocytosis associated with progressive anterior horn cell axonal degeneration (Thomas), *LETTER*, 624; reply (Ashwal), *LETTER*, 625
- Antibodies, antineurofilament protein**  
antineurofilament protein antibodies in a child with opso-clonus-myoclonus (Noetzel et al), 403A
- Antibodies, monoclonal**  
identification of the inflammatory cells in the central nervous system of patients with adrenoleukodystrophy (Griffin et al), 660  
immunohistochemical studies with monoclonal antibodies recognizing human neurons in formalin-fixed tissue (Antel et al), 130A  
monoclonal antibodies to acetylcholine receptor secreted by human  $\times$  human hybridomas derived from lymphocytes of a patient with myasthenia gravis (Blair et al), 120A
- Anticholinergics**  
pharmacokinetics of trihexyphenidyl after short-term and long-term administration to dystonic patients (Burke and Fahn), 35
- Anticoagulation**  
galactosialidosis: low  $\beta$ -galactosidase activity in serum after long-term clotting (Sakuraba et al), 261  
a multicenter survey of anticoagulation parameters when using heparin and warfarin (Alberts and Massey), 126A
- Anticonvulsants**  
anticonvulsant drugs and cognitive function (Trimble and Thompson), 412A  
asymptomatic children with epilepsy derive doubtful benefit from screening for anticonvulsant-induced liver, blood, and renal damage (Camfield et al), 379A  
differential neurotoxicity of four major anticonvulsants (Smith et al), 119A  
growth of children of epileptic mothers treated with anti-epileptic drugs (Robertson et al), 385A
- Antidepressants**  
acute effects of antidepressants on hippocampal seizures (Clifford et al), 692
- Antigenic determinants**  
sharing of antigenic determinants between myelin and enteric bacteria (Dieperink et al), 129A
- Antigen injection**  
immune response in draining lymph nodes and spleen following intraventricular injection of antigen (Hochwald et al), 128A
- Antimuscarinic therapy**  
concomitant neuroleptic and antimuscarinic treatment: binding and biochemistry (Goetz et al), 150A
- Anti-myelin-associated glycoprotein**  
neuropathy and anti-myelin-associated glycoprotein IgM M proteins: T cell regulation of M protein secretion in vitro (Latov et al), 182
- Aphasia**  
buccofacial apraxia without aphasia due to a right parietal lesion (Kramer et al), 512  
implementation of a visual communication system on a microcomputer for aphasic patients (Weinrich et al), 148A
- Apnea, ictal**  
cerebral cortical function in infants at risk for sudden infant death syndrome (Clancy and Spitzer), 41
- Apraxia**  
buccofacial apraxia without aphasia due to a right parietal lesion (Kramer et al), 512
- Arachnoid cysts, intracranial**  
clinical features and magnetic resonance images of primary intracranial arachnoid cysts (Gandy et al), 140A
- Arcus senilis**  
oculosympathetic dysfunction: effects on arcus senilis (Dagen and Appenzeller), 150A

- Arrhythmia**  
cardiovascular regulation and lesions of the central nervous system (Talman), *NEUROLOGICAL PROGRESS*, 1
- Arsenic toxicity**  
subacute arsenic toxicity presenting on clinical and electromyographic examination as Guillain-Barré syndrome (Donofrio and Wilbourn), 156A
- Aspergillosis, central nervous system**  
aspergillosis of the central nervous system: clinico-pathological analysis of 17 patients (Walsh et al), 574
- Aspirin**  
aspirin therapy for Sturge-Weber syndrome (Roach et al), 387A  
influenza B virus model of Reye's syndrome in mice: the effect of aspirin (Davis et al), 556
- Asterixis**  
bilateral asterixis in frontal tumor (Noda and Umezaki), *LETTER*, 366  
hip flexion-abduction to elicit asterixis in unresponsive patients (Noda et al), 96
- Astrocytes**  
effects of ammonia on glutamate,  $\gamma$ -aminobutyric acid, and rubidium uptake by astrocytes (Norenberg et al), 149A
- Astrocytoma, pontomedullary**  
central neurogenic hyperventilation: clinical-pathological correlations (Cohn et al), 163A
- Atherosclerosis**  
comparison of amaurosis fugax and transient cerebral ischemia: a prospective clinical and arteriographic study (Hurwitz et al), 698
- Atrial enlargement**  
left atrial enlargement increases stroke risk in patients with atrial fibrillation (Caplan et al), 124A
- Atrial fibrillation**  
left atrial enlargement increases stroke risk in patients with atrial fibrillation (Caplan et al), 124A
- Atrophy, brain**  
reversibility of cerebral hypoperfusion and brain atrophy in Wernicke-Korsakoff syndrome (Meyer et al), 142A
- Atrophy, infantile spinal**  
infantile spinal muscular atrophy with olivopontocerebellar atrophy (Chou et al), 402A
- Atrophy, small-group**  
specificity of nerve changes in sea-blue histiocytosis (Kepes), *LETTER*, 625; reply (Ashwal), *LETTER*, 625
- Attention deficit disorder**  
plasma and urinary monamines and metabolites following debrisoquin in attention deficit disorder (Shaywitz et al), 393A
- Auditory pathways**  
carotid ultrasound and long-latency auditory evoked potentials in 11 children with right common carotid artery ligation at birth (Lott et al), 120A  
left ear suppression on verbal dichotic tests in patients with multiple sclerosis (Rubens et al), 459
- Autism, infantile**  
cerebrospinal fluid beta endorphin immunoreactivity is elevated in infantile autism and decreased by fenfluramine treatment (Ross et al), 418A  
cerebrospinal fluid indoleamine and monoamine effects of fenfluramine treatment of infantile autism (Ross et al), 394A
- Autoimmune diseases**  
developmental dyslexia: four consecutive patients with cortical anomalies (Galaburda et al), 222  
the Melkersson-Rosenthal syndrome: a case with increased CNS IgG synthesis (Durelli and Cocito), *LETTER*, 623
- Autoimmune response**  
autoimmune response of patients with paraneoplastic cerebellar degeneration to a Purkinje cell cytoplasmic protein antigen (Jaekle et al), 592
- Autonomic failure**  
plasma beta-endorphin and adrenocorticotrophic hormone responses to insulin hypoglycemia in patients with chronic autonomic failure (Polinsky et al), 164A
- Autonomic nervous system**  
clonidine's effects on autonomic nervous system function in patients with tic (Goetz et al), 139A
- Autonomic neuropathy, peripheral**  
chronic idiopathic anhidrosis (Low et al), 344
- Autoradiography**  
neurotransmitter receptor alterations in Huntington's disease: autoradiographic and homogenate studies with special reference to benzodiazepine receptor complexes (Whitehouse et al), 202
- Autorefractory phenomenon, experimental**  
preclinical drug screening: a model of a "clinical" autorefractory state with thyrotropin-releasing hormone but not with the more excitatory analogue DN-1417 (Beydoun et al), 150A
- Axon**  
in vitro studies on axon-Schwann cell interaction (Tennekoon et al), 390A
- Axon degeneration**  
amyotrophic lateral sclerosis: part 1. clinical features, pathology, and ethical issues in management (Tandan and Bradley), *NEUROLOGICAL PROGRESS*, 271  
immunofluorescence study of patients with neuropathy and IgM M proteins (Takatsu et al), 173
- Axon-Schwann cell interaction**  
in vitro studies on axon-Schwann cell interaction (Tennekoon et al), 390A
- Axon swelling**  
reversible diabetic nerve dysfunction: structural correlates to electrophysiological abnormalities (Sima and Brismar), 21
- Azathioprine**  
azathioprine and steroids are not more effective in decreasing multiple sclerosis intra-blood-brain barrier IgG synthesis than steroids alone (Staughtis et al), 356  
isolated angiitis of the central nervous system (Craven and French), 263
- Basal ganglia**  
focal disruption of neurotransmitter receptor patterns in basal ganglia after perinatal hypoxic-ischemic encephalopathy (Johnston and Torke), 406A
- Basement membrane**  
plasminogen activator and basement membrane degradation in denervated muscle: possible role as negative trophic factor in amyotrophic lateral sclerosis (Festoff et al), 159A
- B-cell hybridoma**  
generation of human B-cell hybridomas secreting anti-MAG proteins from patients with neuropathy (Spatz et al), 160A
- Behavioral effects**  
behavioral effects of phenobarbital and mephobarbital: a randomized double-blind crossover study in children (Young et al), 413A
- Behavioral testing**  
behavioral characteristics of unmedicated patients with epilepsy compared with those of normal controls (Smith et al), 153A

## Benzodiazepine receptors

neurotransmitter receptor alterations in Huntington's disease: autoradiographic and homogenate studies with special reference to benzodiazepine receptor complexes (Whitehouse et al), 202

## Bicuculline-induced seizures, experimental

<sup>31</sup>P NMR study of cerebral metabolism during prolonged seizures in the neonatal dog (Young et al), 14

## Bioenergetics

investigation of human mitochondrial myopathies by phosphorus magnetic resonance spectroscopy (Arnold et al), 189

## Biotinidase deficiency

biotinidase deficiency: initial clinical features and rapid diagnosis (Wolf et al), 614

## Blood-brain barrier

azathioprine and steroids are not more effective in decreasing multiple sclerosis intra-blood-brain barrier IgG synthesis than steroids alone (Staugaitis et al), 356  
effect of transient cerebral ischemia and hyperosmotic blood-brain barrier disruption on the somatosensory evoked potential (Warnke et al), 141A

permeability of the blood-brain barrier to sodium and sucrose in ischemic cerebral edema (Lo et al), 384A

## Blood-brain barrier permeability, experimental

leukotrienes increase blood-brain barrier permeability following intraparenchymal injections in rats (Black and Hoff), 349

## Blood flow

simultaneous measurements of blood flow and permeability in a xenotransplanted human medulloblastoma cell line (Warnke et al), 141A

## Blood pressure

cardiovascular regulation and lesions of the central nervous system (Talman), NEUROLOGICAL PROGRESS, 1  
diabetic autonomic dysfunction, blood pressure, and sleep (Guilleminault et al), 670

relationship of blood pressure variations to the development of intraventricular hemorrhage in preterm infants (Shields et al), 381A

## Blood velocity, carotid artery

carotid arterial blood velocity patterns in brain dead children (Ahmann), 416A

## Books

*Clinical Electromyography: Nerve Conduction Studies*, by Oh (Logigian), 728

*A History of Neurophysiology in the 17th and 18th Centuries: From Concept to Experiment*, by Brazier (brief review), 728

*Neuroanatomical Pathways*, by Poritsky (brief review), 728

*Research Progress in Motor Neurone Disease*, edited by Rose (brief review), 728

*Senile Dementia: Outlook for the Future* (Vol 5, Modern Aging Research), edited by Wertheimer and Marois (brief review), 728

## Bone marrow transplantation

bone marrow transplant for metachromatic leukodystrophy (Lipton et al), 399A

## Brachial plexus neuropathy

brachial plexus neuropathy in the population of Rochester, Minnesota, 1970-1981 (Beghi et al), 320

## Brain biopsy

progressive multifocal leukoencephalopathy: investigation of three cases using in situ hybridization with JC virus biotinylated DNA probe (Aksamit et al), 490

## Brain death

the auditory pathology of brain death as revealed by auditory evoked potentials (Kaga et al), 360

## Brain death, childhood

carotid arterial blood velocity patterns in brain dead children (Ahmann), 416A

## Brain function, neonatal

combining assessment methods for brain function in pre-term neonates (Ellison et al), 410A

## Brain glucose

<sup>31</sup>P NMR study of cerebral metabolism during prolonged seizures in the neonatal dog (Young et al), 14

## Brain injury

differential effects on intelligence of early left versus right brain injury (Nass et al), 393A

## Brain lesions, focal

impairment of stereopsis with focal brain lesions (Rizzo and Damasio), 147A

## Brain neoplasms

deteriorating function of the uninvolved hemisphere in two patients with left-sided malignant gliomas (Buck et al), 396A

long-term survivors of brainstem gliomas (Cohen et al), 395A

prospective intellectual testing in children with brain tumors (Duffner et al), 405A

## Brain neoplasms, childhood

brain tumors in children less than 3 years of age: chemotherapy followed by delayed irradiation (Horowitz et al), 395A

leptomeningeal dissemination of primary central nervous system tumors of childhood (Packer et al), 217

magnetic resonance imaging demonstration of brain tumor in children with complex partial seizures (Kilroy et al), 405A

psychological functioning of children previously treated for temporal lobe tumor (Mulhern et al), 396A

treatment of recurrent primary brain tumors of childhood with carboplatin (Walker et al), 406A

## Brain neoplasms, development of

developmental history of brain tumors: evidence of early neurological dysfunction in adults with malignant gliomas (Staunton et al), 139A

## Brain neoplasms, experimental

vasoactive drugs produce selective changes in flow to experimental brain tumors (Panther et al), 712

## Brain neoplasms, infantile

brain tumors presenting as a seizure disorder in infants (Rutledge et al), 396A

## Bromocriptine

escape from bromocriptine (Kupersmith et al), 142A

## Bulbar weakness

vitamin E deficiency associated with vision loss and bulbar weakness (Larsen et al), 725

## Calcium antagonists

effect of pretreatment with the calcium antagonist nimodipine on local cerebral blood flow and histopathology after middle cerebral artery occlusion (Mohamed et al), 705

## Calcium flux

regulation of anterior pituitary calcium flux by somatostatin (Login and Judd), 151A

## Canavan's disease

similarity of brain CT appearance in spongy degeneration to that of subacute necrotizing encephalomyelopathy (Lo et al), 352

## Capillary proliferation

partial purification of an endothelial cell growth factor from rat brain (Robertson et al), 386A

- Capsaicin**  
neurogenic flare responses following topical application of capsaicin in humans (Helme and McKernan), 505
- Carbamazepine**  
the association of carbamazepine intoxication and erythromycin use (Miller), 413A  
carbamazepine metabolism in patients with epilepsy (Holmes et al), 152A  
comparison of the relative bioavailability and pharmacokinetics of carbamazepine tablets and chewable tablet formulations (Maas et al), 379A  
hematological monitoring with carbamazepine therapy (Gay and Evans), 413A
- Carbidopa**  
the effect of carbidopa on the pharmacokinetics of intravenously administered levodopa: the mechanism of action in the treatment of parkinsonism (Nutt et al), 537
- Carbohydrate metabolism**  
is Rett's syndrome a disorder of carbohydrate metabolism? hyperpyruvic acidemia and treatment by ketogenic diet (Haas and Rice), 418A
- Carboplatin**  
treatment of recurrent primary brain tumors of childhood with carboplatin (Walker et al), 406A
- Carboxylase deficiency**  
biotinidase deficiency: initial clinical features and rapid diagnosis (Wolf et al), 614
- Cardiac dysfunction, experimental**  
cardiac dysfunction during status epilepticus in the neonatal pig (Young et al), 291
- Cardiomyopathy**  
lethal cardiomyopathy and central nervous system involvement in a family with X-linked muscular dystrophy (Bergia et al), 402A
- Cardiopulmonary resuscitation**  
outcome after cardiopulmonary resuscitation: relation to seizures and myoclonus (Krumholz et al), 152A
- Carotid artery**  
carotid ultrasound and long-latency auditory evoked potentials in 11 children with right common carotid artery ligation at birth (Lott et al), 120A  
leukoencephalopathy following intracarotid chemotherapy: neuropathology and positron emission tomography (Junck et al), 139A
- Carotid occlusive disease**  
repetitive involuntary movement associated with episodic cerebral ischemia (Yanagihara et al), 244
- Catecholamine levels**  
elevated catecholamines in moyamoya disease (Hammond and Huttenlocher), 387A  
an unusual movement disorder associated with tyrosinosis and elevated cerebrospinal fluid catecholamines (Rust et al), 399A
- Cat scratch disease**  
central nervous system involvement in cat scratch disease (Lewis and Tucker), 392A
- Central nervous system, chemical disturbance of**  
cardiovascular regulation and lesions of the central nervous system (Talman), *NEUROLOGICAL PROGRESS*, 1
- Central nervous system glia**  
obligatory relationship between the sterol biosynthetic pathway and deoxyribonucleic acid synthesis in central nervous system glia (Langan and Volpe), 384A
- Central nervous system regeneration**  
in vitro studies of fetal and adult central nervous system regeneration (Whelan), 380A
- Central pontine myelinolysis**  
effect of rapid correction of chronic hyponatremia on brain water and amino acid contents in developing mice: possible relationship to central pontine myelinolysis (Thurston and Hauhart), 383A
- Cerebellar degeneration**  
autoimmune response of patients with paraneoplastic cerebellar degeneration to a Purkinje cell cytoplasmic protein antigen (Jaekle et al), 592  
case-control study of alcoholic cerebellar degeneration (Estlin), 144A
- Cerebral arteries**  
clinical features and mechanism of occipital infarction in the posterior cerebral artery territory (Pessin et al), 123A  
isolated angiitis of the central nervous system (Craven and French), 263
- Cerebral artery occlusion, experimental**  
effect of pretreatment with the calcium antagonist nimodipine on local cerebral blood flow and histopathology after middle cerebral artery occlusion (Mohamed et al), 705
- Cerebral atrophy, infantile**  
diagnosis of cerebral atrophy in infants by the nearfield method: a new technique in cranial sonography (Fischer), 410A
- Cerebral blood flow**  
asymmetries in cerebral blood flow in patients with unilateral chronic infarction compared with stroke-prone subjects (Feinberg et al), 124A  
cerebral blood flow velocity as determined by Doppler is related to regional cerebral blood flow as determined by positron emission tomography (Perlman et al), 407A  
insulin decreases regional cerebral blood flow (Duckrow et al), 123A  
<sup>31</sup>P NMR study of cerebral metabolism during prolonged seizures in the neonatal dog (Young et al), 14
- Cerebral blood flow, experimental**  
effect of pretreatment with the calcium antagonist nimodipine on local cerebral blood flow and histopathology after middle cerebral artery occlusion (Mohamed et al), 705  
preferential blood flow to brainstem during generalized seizures in newborn monkeys is not coupled to metabolic activation (Fujikawa et al), 152A  
regional glucose utilization and blood flow following graded forebrain ischemia in the rat: correlation with neuropathology (Ginsberg et al), 470
- Cerebral blood flow, neonatal**  
evaluation of the cerebral circulation in neonates following extracorporeal membrane oxygenation (Voorhies et al), 380A  
neurotransmitter receptor distributions in human cerebral cortex (Uhl and Whitehouse), 117A
- Cerebral cortex**  
cerebral cortical function in infants at risk for sudden infant death syndrome (Clancy and Spitzer), 41
- Cerebral dysgenesis**  
neuronal ribonucleic acid during normal brain development and in cerebral dysgenesis (Sarnat), 386A
- Cerebral edema, ischemic**  
permeability of the blood-brain barrier to sodium and sucrose in ischemic cerebral edema (Lo et al), 384A
- Cerebral infarction. See Infarction, cerebral**
- Cerebral injury**  
leukotrienes increase blood-brain barrier permeability following intraparenchymal injections in rats (Black and Hoff), 349
- Cerebral ischemia. See Ischemia, cerebral**
- Cerebral metabolism**  
compulsive self-stimulation of the nucleus ventralis posterolateralis: studies of behavior, endocrine response,

- Cerebral metabolism (continued)**  
 regional cerebral metabolic rate for glucose, electroencephalogram, and evoked potentials (Portenoy et al), 119A
- <sup>31</sup>P NMR study of cerebral metabolism during prolonged seizures in the neonatal dog (Young et al), 14
- Cerebral palsy**  
 neonatal neurosonographic correlates of cerebral palsy in preterm infants (Graziani et al), 410A
- Cerebrospinal fluid**  
 aspergillosis of the central nervous system: clinicopathological analysis of 17 patients (Walsh et al), 574  
 a derivative of myelin-associated glycoprotein in cerebrospinal fluid of normal subjects and patients with neurological disease (Yanagisawa et al), 464  
 multiple sclerosis: activated cells in cerebrospinal fluid in acute exacerbations (Noronha et al), 722
- Cerebrovascular disease, false**  
 hypoglycemia masquerading as cerebrovascular disease (hypoglycemic hemiplegia) (Wallis et al), 510
- Cerebrovascular disorders**  
 ischemic cerebrovascular disease in the young adult: emergence of oral contraceptive use and pregnancy as the major risk factors in the 1980s (Brick and Riggs), 125A  
 proton magnetic resonance imaging in cerebrovascular disease (Salgado et al), 122A
- Ceroid lipofuscinosis**  
 two cases of slowly progressive spinocerebellar degeneration with polyneuropathy associated with ceroid lipofuscinosis in one family (Wisniewski et al), 400A
- C fiber afferent nerves**  
 neurogenic flare responses following topical application of capsaicin in humans (Helme and McKernan), 505
- Chagas' disease, experimental**  
 neuropathy associated with experimental Chagas' disease (Said et al), 676
- Chemotherapy**  
 brain tumors in children less than 3 years of age: chemotherapy followed by delayed irradiation (Horowitz et al), 395A  
 efficacy of combination chemotherapy with lomustine, vincristine, and cisplatin in patients with primitive neuroectodermal tumors—medulloblastoma of childhood (Packer et al), 394A  
 preradiation chemotherapy for newly diagnosed central nervous system germinoma—an attempt to reduce the radiotherapy dose while increasing survival (Allen et al), 404A
- Chenodeoxycholic acid**  
 treatment of cerebrotendinous xanthomatosis with chenodeoxycholic acid (Pedley et al), 517
- Cherry red spot**  
 cherry red spot in association with galactosylceramide- $\beta$ -galactosidase deficiency (Hofman et al), 398A
- Chickenpox**  
 chickenpox with delayed contralateral hemiparesis caused by cerebral angitis (Kamholz and Tremblay), 358
- Chloramphenicol**  
 effects of chloramphenicol on supersensitivity induced by chronic administration of neuroleptic agents (Friedman and Giambalvo), 138A
- Choline acetyltransferase**  
 dopaminergic and cholinergic lesions in progressive supranuclear palsy (Ruberg et al), 523  
 progressive supranuclear palsy: relationship between extrapyramidal disturbances, dementia, and brain neurotransmitter markers (Kish et al), 530
- Choline acetyltransferase, experimental**  
 choline acetyltransferase immunoreactivity localized to four types of synapses in the rat interpeduncular nucleus (Lenn et al), 399A
- Cholinergic agents, experimental**  
 cortical cholinergic innervation (Mesulam et al), 118A
- Cholinergic-blocking agents**  
 central cholinergic blockade by spiromustine studied by positron emission tomography (Staunton et al), 118A
- Cholinergic neurons, neonatal**  
 nerve growth factor is a potent signal for cholinergic neurons in neonatal brain (Johnston et al), 382A
- Cholinergic receptors**  
 reductions in nicotinic but not muscarinic cholinergic receptors in Alzheimer's disease measured using [<sup>3</sup>H]acetylcholine (Whitehouse et al), 145A
- Chorea, transient**  
 transient chorea induced by phenytoin (Filloux and Thompson), 412A
- Chromaffin system**  
 transplantation of human neurons and adrenal chromaffin cells into rodent brain (Kim et al), 117A
- Chromosome 4**  
 construction of chromosome 4 libraries (Payne et al), 143A
- Chromosome X**  
 construction of an X/21 translocation chromosome library from a female patient with Duchenne muscular dystrophy (Siddique et al), 159A
- Clone analysis**  
 phenotypic and functional analysis of T cells cloned directly from the blood and cerebrospinal fluid of patients with multiple sclerosis (Hafler et al), 451
- Cloned cells**  
 in vivo activated cells in a patient with active multiple sclerosis which were cloned and found to be measles reactive (Noronha), 128A
- Clonidine**  
 clonidine's effects on autonomic nervous system function in patients with tic (Goetz et al), 139A
- Clotting, blood**  
 galactosialidosis: low  $\beta$ -galactosidase activity in serum after long-term clotting (Sakuraba et al), 261
- Cochlear nerve**  
 the auditory pathology of brain death as revealed by auditory evoked potentials (Kaga et al), 360
- Cognitive function**  
 anticonvulsant drugs and cognitive function (Trimble and Thompson), 412A  
 structural brain correlates of cognitive and emotional disorder in multiple sclerosis (Rabins et al), 130A
- Cocaine inhalation**  
 perinatal cerebral infarction with maternal cocaine inhalation (Stack et al), 407A
- Cold pressor test**  
 attenuation of cold pressor test: evidence for decreased sympathetic tone in endurance-trained subjects (Appenzeller et al), 150A
- Coma**  
 acute traumatic midbrain hemorrhage (Ropper and Miller), 80  
 the extent of injury to the reticular formation that is necessary to produce coma (Ruff and Spence), 125A  
 syndrome of opsoclonus-myoclonus in hyperosmolar nonketotic coma (Matsumura et al), LETTER, 623
- Coma, childhood**  
 childhood coma: improved prediction of outcome with somatosensory and brainstem auditory evoked potentials (White et al), 417A  
 closed head injury in childhood: neurobehavioral outcome (Filley et al), 146A

- Complex partial seizures**  
 carbamazepine metabolism in patients with epilepsy (Holmes et al), 152A  
 complex partial seizures: correlation of clinical and metabolic features (Holmes et al), 153A  
 complex partial seizures of frontal lobe origin (Williamson et al), 497  
 magnetic resonance imaging demonstration of brain tumor in children with complex partial seizures (Kilroy et al), 405A  
 nocturnal plasma prolactin rise in patients with complex partial seizures (Molaie et al), 719  
 risk factors for complex partial seizures: a population-based case-control study (Rocca et al), 153A  
 self-abatement of complex partial seizures (Pritchard et al), 265
- Complex partial status epilepticus**  
 complex partial status epilepticus: a depth-electrode study (Williamson et al), 647
- Computed tomography.** *See* Tomography, x-ray computed
- Contraceptives, oral**  
 ischemic cerebrovascular disease in the young adult: emergence of oral contraceptive use and pregnancy as the major risk factors in the 1980s (Brick and Riggs), 125A
- Contracture tests**  
 neuromuscular diseases with positive contracture tests (Heiman-Patterson et al), 158A
- Copolymer I**  
 multiple sclerosis: effect of copolymer I on clinical, intra-blood-brain-barrier, and IgG synthesis variables (Baumhefner et al), 129A
- Corpus callosum resection**  
 total corpus callosum resection in three children with intractable seizures (Murphy et al), 411A
- Corrections**, 319, 697
- Cortisol**  
 nocturnal plasma prolactin rise in patients with complex partial seizures (Molaie et al), 719  
 serum prolactin and cortisol levels in evaluation of pseudoepileptic seizures (Pritchard et al), 87
- Cramp, nocturnal**  
 nocturnal cramp in chronic lumbosacral radiculopathies (Baruah), 161A
- Craniofacial nerve**  
 neurological findings in children with malformed ears (Wiznitzer and Rapin), 388A
- Craniosynostosis**  
 hydrocephalus and mental retardation in craniosynostosis (Noetzel et al), 389A
- Creatine kinase**  
 serum creatine kinase B after radiographic procedures with contrast media (Pfeiffer et al), 126A
- Creutzfeldt-Jakob disease**  
 Creutzfeldt-Jakob disease of long duration (Davanipour et al), 134A  
 an evaluation of a zoonotic hypothesis for a slow viral infection (Davanipour et al), 134A  
 scrapie-specific proteins vary in different hosts (Bendheim et al), 134A
- Cyclophosphamide**  
 intensive and chronic cyclophosphamide administration to patients with multiple sclerosis had no major effect on intra-blood-brain-barrier IgG synthesis (Tourtellotte et al), 131A
- Cysteine accumulation**  
 Hallervorden-Spatz disease: cysteine accumulation and cysteine dioxygenase deficiency in the globus pallidus (Perry et al), 482
- Cysteine dioxygenase**  
 Hallervorden-Spatz disease: cysteine accumulation and cysteine dioxygenase deficiency in the globus pallidus (Perry et al), 482
- Cytomegalovirus**  
 cytomegalovirus and herpes simplex virus ascending myelitis in a patient with acquired immune deficiency syndrome (Tucker et al), 74
- Cytoskeletal proteins**  
 prognostic importance of expression of cytoskeletal proteins in childhood primitive neuroectodermal tumors (medulloblastoma) (Packer et al), 140A
- Dandy-Walker syndrome**  
 Dandy-Walker syndrome revisited (Maria et al), 389A
- Debrisoquin**  
 plasma and urinary monamines and metabolites following debrisoquin in attention deficit disorder (Shaywitz et al), 393A
- Degeneration, nerve**  
 sea-blue histiocytosis associated with progressive anterior horn cell axonal degeneration (Thomas), LETTER, 624; reply (Ashwal), LETTER, 624
- Degeneration, spinocerebellar**  
 the effects of TRH on F waves recorded from antagonistic muscles in human subjects (Delwaide and Schoenen), LETTER, 366  
 mitochondrial dysfunction in spinocerebellar and macular degeneration (Peterson et al), 146A
- Degeneration, spongy**  
 similarity of brain CT appearance in spongy degeneration to that of subacute necrotizing encephalomyelopathy (Lo et al), 352
- Dementia**  
 clinical history, brain metabolism, and neuropsychological function in Alzheimer's disease (Cutler et al), 298  
 progressive supranuclear palsy: relationship between extrapyramidal disturbances, dementia, and brain neurotransmitter markers (Kish et al), 530  
 urinary sialic acid excretion in patients evaluated for seizures, dementia, and/or severe developmental delay (Carroll et al), 411A
- Demyelinating disease**  
 $\alpha$ -1 antitrypsin phenotypes in demyelinating disease: an association between demyelinating disease and the allele PiM3 (McCombe et al), 514
- Demyelinating disease, experimental**  
 genetic regulation of clinical expression in relapsing demyelinating disease (Knobler et al), 128A  
 localization of lead in rat peripheral nerve by electron microscopy (Windebank and Dyck), 197  
 the role of proteolytic cleavage in Theiler's murine encephalomyelitis virus demyelinating disease (Nitayaphan et al), 133A  
 Theiler's murine encephalomyelitis virus-induced demyelinating disease: correlation of disease incidence with specific H-2 region genes and with virus-specific cell-mediated immune responses (Clatch et al), 133A
- Demyelination**  
 amyotrophic lateral sclerosis: part 1. clinical features, pathology, and ethical issues in management (Tandan and Bradley), NEUROLOGICAL PROGRESS, 271  
 a derivative of myelin-associated glycoprotein in cerebrospinal fluid of normal subjects and patients with neurological disease (Yanagisawa et al), 464  
 multifocal central nervous system demyelination in mice after lip inoculation with herpes simplex virus type I (Kastrukoff et al), 132A

- Dendrites, abnormality of**  
neuronal and dendritic abnormalities in a child with the maternal phenylketonuria syndrome (Lacey and Terplan), 384A
- Development disorders**  
urinary sialic acid excretion in patients evaluated for seizures, dementia, and/or severe developmental delay (Carroll et al), 411A
- Dexamethasone**  
positron emission tomographic measurement of blood-to-brain and blood-to-tumor transport of  $^{82}\text{Rb}$ : the effect of dexamethasone and whole-brain radiation therapy (Jarden et al), 636
- Diabetic autonomic dysfunction**  
diabetic autonomic dysfunction, blood pressure, and sleep (Guilleminault et al), 670
- Diabetic neuropathy, experimental**  
reversible diabetic nerve dysfunction: structural correlates to electrophysiological abnormalities (Sima and Brismar), 21  
the structural basis for irreversible diabetic nerve dysfunction (Sima et al), 163A
- Diazepam**  
another report of nonconvulsive status epilepticus after metrizamide myelography (Wagner), LETTER, 369
- Dichotic tests**  
left ear suppression on verbal dichotic tests in patients with multiple sclerosis (Rubens et al), 459
- Differential absorptiometry**  
determination of muscle mass change in Duchenne dystrophy using differential absorptiometry (Bolin et al), 158A
- Differential diagnosis, computerized**  
computer-assisted differential diagnosis in neurology—work in progress (Cairncross and Goltra), 148A
- DNA probe, viral**  
progressive multifocal leukoencephalopathy: investigation of three cases using *in situ* hybridization with JC virus biotinylated DNA probe (Aksamit et al), 490
- DNA synthesis**  
obligatory relationship between the sterol biosynthetic pathway and deoxyribonucleic acid synthesis in central nervous system glia (Langan and Volpe), 384A
- Dopamine**  
dopaminergic and cholinergic lesions in progressive supranuclear palsy (Ruberg et al), 523  
long-term efficacy of pergolide in patients with Parkinson's disease (Sage and Duvoisin), 137A  
the MPTP mouse: a model for exploring strategies to promote recovery of nigrostriatal dopaminergic neurons after injury? (Ricaurte et al), 117A  
pathophysiology of Tourette syndrome: a positron emission tomographic and postmortem analysis (Singer et al), 416A  
stress-induced neurological impairments in an animal model of parkinsonism (Snyder et al), 544
- Dopaminergic pathways**  
dopaminergic pathways in humans studied by positron emission tomography (Martin et al), 118A
- Down's syndrome**  
abnormalities of the nucleus basalis in Down's syndrome (Casanova et al), 310
- Drug toxicity**  
the clinical value of free phenytoin levels (Theodore et al), 90
- Duchenne dystrophy**  
construction of an X/21 translocation chromosome library from a female patient with Duchenne muscular dystrophy (Siddique et al), 159A
- determination of muscle mass change in Duchenne dystrophy using differential absorptiometry (Bolin et al), 158A
- $^{31}\text{P}$  NMR studies in Duchenne muscular dystrophy (Younkin et al), 415A
- Dysautonomia, familial**  
myopathological findings in familial dysautonomia (Shapiro et al), 401A
- Dyskinesia**  
opioid responsiveness of neuroleptic-induced akathisia (Walters et al), 137A
- Dyslexia, developmental**  
developmental dyslexia: four consecutive patients with cortical anomalies (Galaburda et al), 222
- Dystonia**  
focal intermittent dystonia in Hartnup disease (Darras and Gilmore), 397A  
pharmacokinetics of trihexyphenidyl after short-term and long-term administration to dystonic patients (Burke and Fahn), 35  
parkinsonism-dystonia complex (Klawans and Paleologos), 135A
- Ear deformities**  
neurological findings in children with malformed ears (Wiznitzer and Rapin), 388A
- Ear suppression, left**  
left ear suppression on verbal dichotic tests in patients with multiple sclerosis (Rubens et al), 459
- Ectopic impulse generation**  
pain and paresthesias of primary sensory unit origin: documentation of ectopic impulse generation through micro-neurography in patients (Ochoa et al), 156A
- Edema**  
leukoencephalopathy in diffuse hemorrhagic cerebral amyloid angiopathy (Gray et al), 54
- Editorial**  
clinical neurophysiology of conduction in central motor pathways (Young and Cracco), EDITORIAL, 606  
heart and head, 1985 (Reichek), EDITORIAL, 13  
progressive supranuclear palsy: postmortem chemical analysis (Young), EDITORIAL, 521  
use of interferon in multiple sclerosis (McFarlin), EDITORIAL, 432
- Electrodes, implanted**  
complex partial status epilepticus: a depth-electrode study (Williamson et al), 647
- Electroencephalography**  
changes in epileptic spike configuration and prediction of response to medical treatment of childhood seizures (Frost et al), 210A  
complex partial seizures of frontal lobe origin (Williamson et al), 497  
the electroencephalogram in neonatal herpes simplex virus meningoencephalitis (Mikati et al), 409A  
electroencephalographic abnormalities in Rett's syndrome (Trauner and Haas), 394A  
electrophysiological findings in progressive multifocal leukoencephalopathy (Lipton et al), 135A  
3-Hz spike-and-wave bursts of human generalized epilepsy and 14-Hz sleep spindles share a common brain mechanism (Kellaway and Frost), 154A  
nonepileptogenic epileptiform electroencephalographic activity (Klass and Westmoreland), NEUROLOGICAL PROGRESS, 627  
temporal lobe asymmetry of electroencephalographic spectra in patients with memory loss (Vanderzant et al), 154A  
a three-dimensional view of electrophysiological waveforms (Towle et al), 151A

- Electroencephalography, neonatal  
cerebral cortical function in infants at risk for sudden infant death syndrome (Clancy and Spitzer), 41  
continuous monitoring of neonatal electroencephalogram processed by a power spectrum analyzer (Zalneraitis et al), 409A  
electroencephalographic abnormalities in preterm infants with and without intracranial hemorrhage (Lacey et al), 409A  
a simplified method for interpretation of electroencephalograms in the preterm neonate (Ellison et al), 381A
- Electrophoresis  
heterogeneity of human skeletal muscle tropomyosin (Giometti and Danon), 234
- Encephalitis, herpes simplex  
comparative study of cerebrospinal fluid, electroencephalography, radioisotope brain scan, and computed tomography in the early diagnosis of herpes simplex encephalitis (Lai et al), 132A  
herpes simplex encephalitis: comparison of in situ hybridization to immunohistochemistry (Aksamit et al), 132A
- Encephalitis virus, Japanese  
Japanese encephalitis: immunocytochemical studies of viral antigen and inflammatory cells in fatal cases (Johnson et al), 567
- Encephalomyelitis, childhood  
magnetic resonance imaging in childhood encephalomyelitis (Bale et al), 391A
- Encephalomyelitis, experimental allergic  
adoptive transfer of experimental allergic encephalomyelitis in PL/J mice (Cross et al), 133A  
genetic regulation of clinical expression in relapsing demyelinating disease (Knobler et al), 128A
- Encephalomyelitis, postinfectious  
magnetic resonance imaging in postinfectious and postvaccinal encephalomyelitis (Belman and Anand), 391A
- Encephalomyelitis, postvaccinal  
magnetic resonance imaging in postinfectious and postvaccinal encephalomyelitis (Belman and Anand), 391A
- Encephalopathy, childhood  
acquired immune deficiency syndrome encephalopathy: some speculations on the pathophysiology (Kairam et al), 390A  
hemorrhagic shock and encephalopathy in infancy (Chavez-Carballo et al), 416A  
neurological complications in infants and children with acquired immune deficiency syndrome (Belman et al), 560
- Encephalopathy, hepatic  
hip flexion-abduction to elicit asterix in unresponsive patients (Noda et al), 96
- Encephalopathy, hypertensive  
hypertensive encephalopathy: diffuse reversible white matter CT abnormalities (Fisher et al), NOTE, 268
- Encephalopathy, mitochondrial  
mitochondrial encephalopathy, lactic acidosis, and stroke-like syndrome (MELAS) (Kuriyama and Igata), LETTER, 625; reply (Pavakis et al), LETTER, 626
- Endothelial cell growth  
partial purification of an endothelial cell growth factor from rat brain (Robertson et al), 386A
- Enteric bacteria  
sharing of antigenic determinants between myelin and enteric bacteria (Dieperink et al), 129A
- Entrapment neuropathy  
Reynaud's phenomenon and entrapment neuropathies (Serra et al), LETTER, 519
- Enzyme-linked immunosorbent assay  
monoclonal IgM in a patient with paraproteinemic polyneuropathy binds to gangliosides containing disialosyl groups (Ilyas et al), 655
- Epidemiology  
brachial plexus neuropathy in the population of Rochester, Minnesota, 1970-1981 (Beghi et al), 320  
identification of environmentally related foci of Parkinson's disease in the Province of Quebec (Barbeau and Roy), 138A  
risk factors for complex partial seizures: a population-based case-control study (Rocca et al), 153A  
stroke in Rochester, Minnesota, since 1935 (Homer and Whisnant), 123A
- Epilepsy  
behavioral characteristics of unmedicated patients with epilepsy compared with those of normal controls (Smith et al), 153A  
carbamazepine metabolism in patients with epilepsy (Holmes et al), 152A  
effect of puberty on epilepsy (Diamantopoulos and Crumrine), 411A  
growth of children of epileptic mothers treated with anti-epileptic drugs (Robertson et al), 385A  
3-Hz spike-and-wave bursts of human generalized epilepsy and 14-Hz sleep spindles share a common brain mechanism (Kellaway and Frost), 154A  
identification of focal lesions in epileptics by computerized electroencephalogram and evoked-potential analysis (Nuwer), 155A
- Epilepsy, asymptomatic  
asymptomatic children with epilepsy derive doubtful benefit from screening for anticonvulsant-induced liver, blood, and renal damage (Camfield et al), 379A
- Epilepsy, myoclonus  
stroke-like episodes in MERRF (Fukuhara), LETTER, 368
- Epilepsy, startle  
sustained myoclonus in a woman with startle epilepsy (Bejar et al), LETTER, 101
- Epilepsy, temporal lobe  
topography of glucose hypometabolism in epilepsy of mesial temporal origin (Abou-Khalil et al), 151A
- Epileptiform activity  
nonepileptogenic epileptiform electroencephalographic activity (Klass and Westmoreland), NEUROLOGICAL PROGRESS, 627
- Episodic dyscontrol  
episodic dyscontrol: a seizure manifestation in children? (Jabbour), 414A
- Epstein-Barr virus  
primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 140A
- Erythrocytes  
Alzheimer's disease: no alteration in the physical state of erythrocyte membrane glycoconjugates (Butterfield et al), LETTER, 105  
the dissociation between erythrocytes and plasma flow in focal ischemia (Izumiyama et al), 121A
- Erythromycin  
the association of carbamazepine intoxication and erythromycin use (Miller), 413A
- Evoked potentials  
cerebral potentials evoked by stimulation of vesicourethral junction (Sarica et al), 154A  
evoked potential testing in relatives of multiple sclerosis patients (Nuwer et al), 30  
identification of focal lesions in epileptics by computerized electroencephalogram and evoked-potential analysis (Nuwer), 155A

- Evoked potentials (*continued*)  
treatment of cerebrotendinous xanthomatosis with chenodeoxycholic acid (Pedley et al), 517
- Evoked potentials, auditory  
acute traumatic midbrain hemorrhage (Ropper and Miller), 80  
the auditory pathology of brain death as revealed by auditory evoked potentials (Kaga et al), 360  
carotid ultrasound and long-latency auditory evoked potentials in 11 children with right common carotid artery ligation at birth (Lott et al), 120A  
childhood coma: improved prediction of outcome with somatosensory and brainstem auditory evoked potentials (White et al), 417A  
prognostic value of serial somatosensory and brainstem auditory evoked potentials in cerebral anoxia (Potolicchio), 121A
- Evoked potentials, experimental  
the emergence of P300 in the alert monkey in an auditory oddball paradigm (Onofri et al), 155A
- Evoked potentials, somatosensory  
childhood coma: improved prediction of outcome with somatosensory and brainstem auditory evoked potentials (White et al), 417A  
effect of transient cerebral ischemia and hyperosmotic blood-brain barrier disruption on the somatosensory evoked potential (Warnke et al), 141A  
long-latency somatosensory evoked potentials in hydranencephaly (Braun et al), 388A  
recovery of somatosensory evoked potential amplitude after movement (Angel et al), 155A
- Evoked response, visual  
visually evoked responses in optic neuritis before and after pulse steroid therapy (Guy et al), 131A
- Extracorporeal membrane oxygenation  
evaluation of the cerebral circulation in neonates following extracorporeal membrane oxygenation (Voorhies et al), 380A
- Extrapyramidal disorders  
progressive supranuclear palsy: relationship between extrapyramidal disturbances, dementia, and brain neurotransmitter markers (Kish et al), 530
- Eye movements  
acute traumatic midbrain hemorrhage (Ropper and Miller), 80  
maturation of rapid eye movement density in preterm infants' active sleep (Reiman et al), 409A  
neuropsychological correlation of eye movement abnormalities in idiopathic Parkinson's disease (Hunter and Guy), 136A
- Eye movements, saccadic  
Alzheimer's disease: saccadic eye movement dysfunction (Fletcher and Sharpe), 142A
- Falling, idiopathic  
selective association of hemineglect syndromes with multiple idiopathic falls in the institutionalized elderly (Mehler et al), 124A
- Falling, paroxysmal  
paroxysmal falling: an unrecognized sign in multiple sclerosis (Sheremata et al), 130A
- Fasciculus, inferior longitudinal  
the inferior longitudinal fasciculus: a reexamination in humans and monkeys (Tusa and Ungerleider), 583
- Fenfluramine  
cerebrospinal fluid beta endorphin immunoreactivity is elevated in infantile autism and decreased by fenfluramine treatment (Ross et al), 418A  
cerebrospinal fluid indoleamine and monoamine effects of fenfluramine treatment of infantile autism (Ross et al), 394A
- Fibroblasts  
tissue culture studies of neurofibromatosis: effects of axolemmal fragments and cyclic adenosine 3',5'-monophosphate analogues on proliferation of Schwann-like and fibroblast-like neurofibroma cells (Sobue et al), 68
- Flare response, neurogenic  
neurogenic flare responses following topical application of capsaicin in humans (Helme and McKernan), 505
- Flexion, hip  
hip flexion-abduction to elicit asterix in unresponsive patients (Noda et al), 96
- Fragile X syndrome  
fragile X syndrome: associated neurological abnormalities and developmental disabilities (Wisniewski et al), 665
- Frontal cortex  
dopaminergic and cholinergic lesions in progressive supranuclear palsy (Ruberg et al), 523
- Frontal lobe  
complex partial seizures of frontal lobe origin (Williamson et al), 497  
complex partial status epilepticus: a depth-electrode study (Williamson et al), 647
- Fukuyama's congenital muscular dystrophy  
Fukuyama's congenital muscular dystrophy: variant form with muscle inflammation in a non-Japanese American child (Kohrman et al), 400A
- F wave  
the effects of TRH on F waves recorded from antagonistic muscles in human subjects (Delwaide and Schoenen), LETTER, 366
- Galactosidase  
cherry red spot in association with galactosylceramide- $\beta$  galactosidase deficiency (Hofman et al), 398A  
galactosialidosis: low  $\beta$ -galactosidase activity in serum after long-term clotting (Sakuraba et al), 261
- Galactosylceramide  
cherry red spot in association with galactosylceramide- $\beta$  galactosidase deficiency (Hofman et al), 398A
- Ganglion compression  
percutaneous balloon gangliolysis for trigeminal neuralgia (Mullan and Lichtor), 156A
- Gangliosides  
ganglioside patterns in amyotrophic lateral sclerosis brain regions (Rapport et al), 60  
monoclonal IgM in a patient with paraproteinemic polyneuropathy binds to gangliosides containing disialosyl groups (Ilyas et al), 655
- Gangliosidosis, experimental  
AB variant of GM<sub>2</sub> gangliosidosis: morphological and neurochemical observations in a German shorthair pointer (Singer et al), 396A
- Gene expression  
selective gene expression in focal cerebral ischemia (Jacewicz et al), 126A  
thyroid hormone control of gene expression in Sprague-Dawley rat liver and brain (Stein), 385A
- Genetic diseases  
amyotrophic lateral sclerosis: part 2. etiopathogenesis (Tandan and Bradley), NEUROLOGICAL PROGRESS, 419  
congenital diaphragm paresis: a marker of generalized neuromuscular disease? (Leshner and Campbell), 401A  
dominantly inherited congenital myasthenic syndrome: a report of a new multigenerational pedigree (Chutkow et al), 159A

- fragile X syndrome: associated neurological abnormalities and developmental disabilities (Wisniewski et al), 665
- inherited myoclonic dystonia (Kurlan et al), 162A
- a new hereditary sensory autonomic neuropathy in a Navajo population (Johnsen et al), 400A
- Genetic regulation
- genetic regulation of clinical expression in relapsing demyelinating disease (Knobler et al), 128A
- Germinoma, central nervous system
- preradiation chemotherapy for newly diagnosed central nervous system germinoma—an attempt to reduce the radiotherapy dose while increasing survival (Allen et al), 404A
- Gilles de la Tourette's disease. *See* Tourette's syndrome
- Glioma
- deteriorating function of the uninvolved hemisphere in two patients with left-sided malignant gliomas (Buck et al), 396A
- developmental history of brain tumors: evidence of early neurological dysfunction in adults with malignant gliomas (Staunton et al), 139A
- long-term survivors of brainstem gliomas (Cohen et al), 395A
- severe cholinotoxicity of spiromustine therapy in brain tumor patients: its reversibility and implications in glioma treatment (Staunton et al), 141A
- Glioma, experimental
- blood-to-tissue transport following irradiation in a rat glioma model (Spence et al), 141A
- Globus pallidus
- Hallervorden-Spatz disease: cysteine accumulation and cysteine dioxygenase deficiency in the globus pallidus (Perry et al), 482
- status epilepticus in well-oxygenated rats causes neuronal necrosis (Nevander et al), 281
- Glucocorticoids
- glucocorticoids potentiate ischemic damage to brain (Sapolsky and Pulsinelli), 125A
- Glucose levels, blood
- effect of admission glucose level on recovery from acute stroke (Levy et al), 122A
- Glucose metabolism
- clinical history, brain metabolism, and neuropsychological function in Alzheimer's disease (Cutler et al), 298
- high-dose leucovorin reverses high-dose methotrexate-induced depression of regional cerebral metabolic rate for glucose in the rat (Phillips et al), 404A
- metabolic correlates of language processing in healthy male adults (Brown et al), 119A
- PET imaging in sleeping normal and narcoleptic subjects (Spire et al), 147A
- topography of glucose hypometabolism in epilepsy of mesial temporal origin (Abou-Khalil et al), 151A
- Glucose metabolism, experimental
- changes in local cerebral glucose metabolism in the walking cat (Schwartzman et al), 148A
- regional glucose utilization and blood flow following graded forebrain ischemia in the rat: correlation with neuropathology (Ginsberg et al), 470
- Glutamate metabolism
- abnormal glutamate metabolism in amyotrophic lateral sclerosis (Plaitakis and Caroscio), 161A
- hypoxia-ischemia causes severe but reversible depression of striatal synaptosomal  $^3\text{H}$ -glutamate uptake (Silverstein et al), 122A
- perinatal hypoxia-ischemia leads to transient depression of striatal synaptosomal  $^3\text{H}$ -glutamate uptake (Silverstein et al), 380A
- Glutamic acid
- progressive supranuclear palsy: relationship between extrapyramidal disturbances, dementia, and brain neurotransmitter markers (Kish et al), 530
- Glycolytic defects
- in vivo exercise kinetics in human muscle glycolytic defects studied by  $^{31}\text{P}$ -magnetic resonance imaging spectroscopy (Argov et al), 162A
- Glycoprotein, anti-myelin-associated
- antiidiotypic antibodies to human anti-myelin-associated glycoprotein IgM—specificity and application (Steck et al), 120A
- characterization of oligosaccharides that bind to anti-myelin-associated glycoprotein M proteins (Shy et al), 129A
- Glycoprotein, myelin-associated
- a derivative of myelin-associated glycoprotein in cerebrospinal fluid of normal subjects and patients with neurological disease (Yanagisawa et al), 464
- a quantitation of myelin-associated glycoprotein and myelin basic protein loss in different demyelinating diseases (Gendelman et al), 324
- Go—no go deficits
- reversible go—no go deficits in a case of frontal lobe tumor (Leimkuhler and Mesulam), 617
- Granule cells
- a quantitative study of the granule cells in the Purkinje cell degeneration mutant (Triarhou et al), 146A
- Granulomatous infiltrates
- neuropathy associated with experimental Chagas' disease (Said et al), 676
- Growth
- growth of children of epileptic mothers treated with anti-epileptic drugs (Robertson et al), 385A
- Guillain-Barré syndrome
- subacute arsenic toxicity presenting on clinical and electromyographic examination as Guillain-Barré syndrome (Donofrio and Wilbourn), 156A
- Hallervorden-Spatz disease
- Hallervorden-Spatz disease: cysteine accumulation and cysteine dioxygenase deficiency in the globus pallidus (Perry et al), 482
- Hamartomas, iris
- iris hamartomas as diagnostic criterion in neurofibromatosis (Boltshauser et al), 415A
- Hammond, William A.
- William A. Hammond, "Cerebral Hyperemia," and the early flowering of American neurology (Golbe), 127A
- Handedness
- developmental dyslexia: four consecutive patients with cortical anomalies (Galaburda et al), 222
- hormonal effects on handedness: leftward bias among females with congenital adrenal hyperplasia (Nass et al), 416A
- left ear suppression on verbal dichotic tests in patients with multiple sclerosis (Rubens et al), 459
- Hartnup disease
- focal intermittent dystonia in Hartnup disease (Darras and Gilmore), 397A
- Head trauma
- closed head injury in childhood: neurobehavioral outcome (Filley et al), 146A
- posttraumatic narcolepsy: report of three patients studied with polysomnography (Roelgen et al), 154A
- Heart failure, congestive
- profound congestive heart failure as the presentation of centronuclear myopathy (Gospe et al), 401A

## Hematological tests

hematological monitoring with carbamazepine therapy (Gay and Evans), 413A

## Hematoma, subdural

clinical course and computed tomographic appearance of medically and surgically treated subdural hematoma (Bender), 127A

## Hemineglect

selective association of hemineglect syndromes with multiple idiopathic falls in the institutionalized elderly (Mehler et al), 124A

## Hemiparesis

aspergillosis of the central nervous system: clinicopathological analysis of 17 patients (Walsh et al), 574  
chickenpox with delayed contralateral hemiparesis caused by cerebral angitis (Kamholz and Tremblay), 358

## Hemiplegia

acute hemiplegia and seizures in infancy, manifestation of a hypersensitivity reaction to ingested protein (Davis and Cannon), 391A

hypoglycemia masquerading as cerebrovascular disease (hypoglycemic hemiplegia) (Wallis et al), 510

the spinal accessory nerve in hemiplegia (Marcus), 388A

## Hemorrhage, cerebral

predictors of 30-day mortality in intracerebral hemorrhage: the NINDS Stroke Data Bank (Tuhim et al), 126A

## Hemorrhage, intracranial infantile

electroencephalographic abnormalities in preterm infants with and without intracranial hemorrhage (Lacey et al), 409A

## Hemorrhage, intraocular

a proposed mechanism of intraocular hemorrhages in infant whiplash-shake injuries (Woody et al), 387A

## Hemorrhage, intraventricular neonatal

pneumothorax and intraventricular hemorrhage in preterm infants: pneumothorax is associated with intraventricular hemorrhage only if there is concomitant severe acidosis and/or hypercarbia (Shields et al), 407A

randomized indomethacin trial for the prevention of intraventricular hemorrhage in very-low-birth-weight neonates (Ment et al), 381A

relationship of blood pressure variations to the development of intraventricular hemorrhage in preterm infants (Shields et al), 381A

treatment of neonatal intraventricular hemorrhage with hydrocephalus by ventriculostomy (Newman et al), 408A

## Hemorrhage, midbrain

acute traumatic midbrain hemorrhage (Ropper and Miller), 80

## Hemorrhage, subarachnoid

atypical features of subarachnoid hemorrhage (Adams et al), 123A

volume depletion and natriuresis in patients with a ruptured intracranial aneurysm (Wijdicks et al), 211

## Hemorrhage, thalamic

CT and PET findings after onset and resolution of Korsakoff's syndrome due to thalamic hemorrhage (Babikian et al), 128A

## Hemodilution

baseline hemodynamic state and response to hemodilution in acute cerebral ischemia (Grotta et al), 126A

## Heparin

a multicenter survey of anticoagulation parameters when using heparin and warfarin (Alberts and Massey), 126A

## Herpes simplex virus

cytomegalovirus and herpes simplex virus ascending my-

elitis in a patient with acquired immune deficiency syndrome (Tucker et al), 74

the electroencephalogram in neonatal herpes simplex virus meningoencephalitis (Mikati et al), 409A

herpes simplex virus infection of isolated human oligodendrocytes (Kastrukoff and Kim), 132A

multifocal central nervous system demyelination in mice after lip inoculation with herpes simplex virus type I (Kastrukoff et al), 132A

## Herpesvirus

recovery of herpesviruses from cerebrospinal fluid of immunodeficient homosexual men (Dix et al), 611

## Herpesvirus ophthalmicus

chickenpox with delayed contralateral hemiparesis caused by cerebral angitis (Kamholz and Tremblay), 358

## Herpes zoster infection

thrombotic cerebral vasculopathy after herpes zoster infection (Eidelberg et al), 134A

## Hexosaminidase deficiency

amyotrophic lateral sclerosis with partial  $\beta$ -hexosaminidase deficiency (Cashman et al), 157A

## Hippocampus

acute effects of antidepressants on hippocampal seizures (Clifford et al), 692

bilateral and limited amygdalohippocampal lesions causing a pure amnesic syndrome (Duyckaerts et al), 314

blockade of synaptic transmission protects rat hippocampal slice from hypoxia (Clark et al), 385A

neuronal alterations in hippocampus after severe hypoglycemia: a light microscopic and ultrastructural study in the rat using the pyroantimonate technique for calcium localization (Simon et al), 149A

## Histiocytosis, sea-blue

sea-blue histiocytosis associated with progressive anterior horn cell axonal degeneration (Thomas), LETTER, 624; reply (Ashwal), LETTER, 625

specificity of nerve changes in sea-blue histiocytosis (Kepes), LETTER, 625; reply (Ashwal), LETTER, 625

## HLA antigens

evoked potential testing in relatives of multiple sclerosis patients (Nuwer et al), 30

## Hodgkin's disease

bilateral and limited amygdalohippocampal lesions causing a pure amnesic syndrome (Duyckaerts et al), 314

recovery of herpesviruses from cerebrospinal fluid of immunodeficient homosexual men (Dix et al), 611

## Huntington's disease

construction of chromosome 4 libraries (Payne et al), 143A

neurotransmitter receptor alterations in Huntington's disease: autoradiographic and homogenate studies with special reference to benzodiazepine receptor complexes (Whitehouse et al), 202

proton nuclear magnetic resonance imaging in Huntington's disease (Sax et al), 142A

## Hybridization techniques

herpes simplex encephalitis: comparison of in situ hybridization to immunohistochemistry (Aksamit et al), 132A

## Hydranencephaly

long-latency somatosensory evoked potentials in hydranencephaly (Braun et al), 388A

## Hydrocephalus

hydrocephalus and mental retardation in craniosynostosis (Noetzel et al), 389A

## Hydrocephalus, neonatal

the effect of lumbar puncture on regional cerebral blood flow as determined by positron emission tomography in

- neonatal posthemorrhagic hydrocephalus (Perlman et al), 379A
- treatment of neonatal intraventricular hemorrhage with hydrocephalus by ventriculostomy (Newman et al), 408A
- Hydroxydopamine**
- contrasting effects of 6-hydroxydopamine on kindling antagonism in neonate and adult rats (Konkol et al), 382A
- Hyperammonemia**
- effects of ammonia on glutamate,  $\gamma$ -aminobutyric acid, and rubidium uptake by astrocytes (Norenberg et al), 149A
- Hypercapnia**
- vasoactive drugs produce selective changes in flow to experimental brain tumors (Panther et al), 712
- "Hyperemia"**
- William A. Hammond, "Cerebral Hyperemia," and the early flowering of American neurology (Golbe), 127A
- Hyperglycemia**
- hyperglycemia augments infarct size in focal experimental brain ischemia (Brint et al), 127A
- Hyperlexia**
- naming ability and strategies in hyperlexic children (Voeller), 393A
- Hyperpyruvicacidemia**
- is Rett's syndrome a disorder of carbohydrate metabolism? hyperpyruvicacidemia and treatment by ketogenic diet (Haas and Rice), 418A
- Hypertension**
- humoral changes in orthostatic hypotension with recurrent hypertension (Talman and Sved), 163A
- hypertensive encephalopathy: diffuse reversible white matter CT abnormalities (Fisher et al), NOTE, 268
- Hyperthermia, malignant**
- malignant hyperthermic reaction to nifedipine in a child with Schwartz-Jampel syndrome (Cook and Henderson-Tilton), 402A
- on-off induced malignant hyperthermia (Pfeiffer and Sucha), 138A
- Hyperventilation, central neurogenic**
- central neurogenic hyperventilation: clinical-pathological correlations (Cohn et al), 163A
- Hypoglycemia**
- hypoglycemia masquerading as cerebrovascular disease (hypoglycemic hemiplegia) (Wallis et al), 510
- neuronal alterations in hippocampus after severe hypoglycemia: a light microscopic and ultrastructural study in the rat using the pyroantimonate technique for calcium localization (Simon et al), 149A
- plasma beta-endorphin and adrenocorticotrophic hormone responses to insulin hypoglycemia in patients with chronic autonomic failure (Polinsky et al), 164A
- Hyponatremia**
- effect of rapid correction of chronic hyponatremia on brain water and amino acid contents in developing mice: possible relationship to central pontine myelinolysis (Thurston and Hauhart), 383A
- Hypoperfusion, white matter**
- leukoencephalopathy in diffuse hemorrhagic cerebral amyloid angiopathy (Gray et al), 54
- Hypoplastic left heart syndrome**
- acquired neuropathological lesions associated with the hypoplastic left heart syndrome (Clancy et al), 388A
- Hypotension**
- cardiac dysfunction during status epilepticus in the neonatal pig (Young et al), 291
- decreased sympathetic neuronal uptake in idiopathic orthostatic hypotension (Polinsky et al), 48
- humoral changes in orthostatic hypotension with recurrent hypertension (Talman and Sved), 163A
- Hypotension, experimental**
- beagle pup model of perinatal cerebral infarction: acute changes in regional cerebral prostaglandins during hemorrhagic hypotension (Ment et al), 408A
- Hypothalamic dopaminergic neurons**
- preservation of hypothalamic dopaminergic neurons in Parkinson's disease (Matzuk and Saper), 552
- Hypothalamic dysfunction**
- lateral hypothalamic dysfunction in Parkinson's disease (der Linden et al), 137A
- Hypoxia**
- effect of hypoxemia on prolonged neonatal seizures: a  $^{31}\text{P}$  nuclear magnetic resonance study (Young et al), 378A
- hypoxia-ischemia causes severe but reversible depression of striatal synaptosomal  $^3\text{H}$ -glutamate uptake (Silverstein et al), 122A
- Hypoxia, perinatal**
- focal disruption of neurotransmitter receptor patterns in basal ganglia after perinatal hypoxic-ischemic encephalopathy (Johnston and Torke), 406A
- perinatal hypoxia-ischemia leads to transient depression of striatal synaptosomal  $^3\text{H}$ -glutamate uptake (Silverstein et al), 380A
- IgG**
- intensive and chronic cyclophosphamide administration to patients with multiple sclerosis had no major effect on intra-blood-brain-barrier IgG synthesis (Tourtellotte et al), 131A
- the Melkersson-Rosenthal syndrome: a case with increased CNS IgG synthesis (Durelli and Cocito), LETTER, 623
- quantitative cerebrospinal fluid IgG measurements as a marker of disease activity in multiple sclerosis (Caroscio et al), 130A
- serial immunological studies in multiple sclerosis patients treated systematically with human alpha interferon (Panitch et al), 434
- IgM**
- antiidiotypic antibodies to human antimyelin-associated glycoprotein IgM—specificity and application (Steck et al), 120A
- IgM monoclonal protein binding to spinal cord and peripheral nerve glycolipids in a patient with motor neuron disease (Donofrio et al), 161A
- immunofluorescence study of patients with neuropathy and IgM M proteins (Takatsu et al), 173
- monoclonal IgM in a patient with paraproteinemic polyneuropathy binds to gangliosides containing disialosyl groups (Ilyas et al), 655
- neuropathy and anti-myelin-associated glycoprotein IgM M proteins: T cell regulation of M protein secretion in vitro (Latov et al), 182
- Imidazoles**
- 1-benzylimidazole inhibits thromboxane synthesis in experimental cerebral ischemia (Pettigrew et al), 125A
- Immune complexes**
- immunological complications in multiple sclerosis patients receiving interferon (Rice et al), 439
- Immune response**
- brachial plexus neuropathy in the population of Rochester, Minnesota, 1970–1981 (Beghi et al), 320
- identification of the inflammatory cells in the central nervous system of patients with adrenoleukodystrophy (Griffin et al), 660
- immune response in draining lymph nodes and spleen fol-

## Immune response (continued)

- lowing intraventricular injection of antigen (Hochwald et al), 128A
- Theiler's murine encephalomyelitis virus-induced demyelinating disease: correlation of disease incidence with specific H-2 region genes and with virus-specific cell-mediated immune responses (Clatch et al), 133A
- Immunofluorescence
  - immunofluorescence study of patients with neuropathy and IgM M proteins (Takatsu et al), 173
- Immunohistochemical studies
  - immunohistochemical studies with monoclonal antibodies recognizing human neurons in formalin-fixed tissue (Antel et al), 130A
- Immunological disorders
  - immunological evaluation of patients with infantile spasms (Hrachovy et al), 414A
- Immunoreactivity
  - somatostatin-like immunoreactivity in Alzheimer's disease (Beal et al), 144A
- Immunosuppressive therapy
  - immunosuppressive therapy in adrenoleukodystrophy (Moser et al), 398A
- Indomethacin
  - randomized indomethacin trial for the prevention of intraventricular hemorrhage in very-low-birth-weight neonates (Ment et al), 381A
- Infarction, brain
  - asymmetries in cerebral blood flow in patients with unilateral chronic infarction compared with stroke-prone subjects (Feinberg et al), 124A
  - buccofacial apraxia without aphasia due to a right parietal lesion (Kramer et al), 512
  - effect of admission glucose level on recovery from acute stroke (Levy et al), 122A
  - left atrial enlargement increases stroke risk in patients with atrial fibrillation (Caplan et al), 124A
  - stroke in a young adult with a familial plasminogen disorder (Furlan et al), 122A
- Infarction, cerebellar
  - cerebellar infarction: review of clinical findings and correlation with computed tomography and magnetic resonance imaging (Simmons et al), 125A
- Infarction, cerebral
  - cerebral infarction in sickle cell trait (Greenberg and Massey), 354
- Infarction, cerebral neonatal
  - focal cerebral infarction in the newborn: a distinct entity (Filipek et al), 406A
  - perinatal cerebral infarction with maternal cocaine inhalation (Stack et al), 407A
- Infarction, cerebral neonatal, experimental
  - beagle pup model of perinatal cerebral infarction: acute changes in regional cerebral prostaglandins during hemorrhagic hypotension (Ment et al), 408A
- Infarction, cerebral nonhemorrhagic
  - nonhemorrhagic cerebral infarction in young adults (Adams et al), 127A
- Infarction, cerebral unilateral
  - infantile spasms secondary to unilateral cerebral infarcts (Alvarez et al), 414A
- Infarction, hemorrhagic
  - aspergillosis of the central nervous system: clinicopathological analysis of 17 patients (Walsh et al), 574
- Infarction, myocardial
  - comparison of amaurosis fugax and transient cerebral ischemia: a prospective clinical and arteriographic study (Hurwitz et al), 698

## Infarction, occipital

- clinical features and mechanism of occipital infarction in the posterior cerebral artery territory (Pessin et al), 123A
- ## Inflammatory response, mononuclear
- Japanese encephalitis: immunocytochemical studies of viral antigen and inflammatory cells in fatal cases (Johnson et al), 567
- ## Influenza virus studies, experimental
- influenza B virus model of Reye's syndrome in mice: the effect of aspirin (Davis et al), 556
  - influenza virus model of Reye's syndrome in mice: antiviral studies (Davis and Wallace), 133A
- ## Insulin
- insulin decreases regional cerebral blood flow (Duckrow et al), 123A
- ## Intellectual deficit
- clinical history, brain metabolism, and neuropsychological function in Alzheimer's disease (Cutler et al), 298
- ## Intelligence testing
- differential effects on intelligence of early left versus right brain injury (Nass et al), 393A
  - do seizures in children cause intellectual deterioration (Ellenberg et al), 389A
  - prospective intellectual testing in children with brain tumors (Duffner et al), 405A
  - psychological functioning of children previously treated for temporal lobe tumor (Mulhern et al), 396A
- ## Interferon
- immunological complications in multiple sclerosis patients receiving interferon (Rice et al), 439
  - serial immunological studies in multiple sclerosis patients treated systematically with human alpha interferon (Panitch et al), 434
- ## Interpeduncular nucleus experimental studies
- choline acetyltransferase immunoreactivity localized to four types of synapses in the rat interpeduncular nucleus (Lenn et al), 399A
- ## Involuntary movements
- repetitive involuntary movement associated with episodic cerebral ischemia (Yanagihara et al), 244
- ## Iris diseases
- iris hamartomas as diagnostic criterion in neurofibromatosis (Boltshauser et al), 415A
- ## Irradiation
- brain tumors in children less than 3 years of age: chemotherapy followed by delayed irradiation (Horowitz et al), 395A
- ## Irradiation, experimental
- blood-to-tissue transport following irradiation in a rat glioma model (Spence et al), 141A
- ## Ischemia
- hypoxia-ischemia causes severe but reversible depression of striatal synaptosomal <sup>3</sup>H-glutamate uptake (Silverstein et al), 122A
- ## Ischemia, brain
- glucocorticoids potentiate ischemic damage to brain (Sapolsky and Pulsinelli), 125A
- ## Ischemia, brain, experimental
- 1-benzylimidazole inhibits thromboxane synthesis in experimental cerebral ischemia (Pettigrew et al), 125A
  - cerebral norepinephrine depletion enhances recovery after brain ischemia (Busto et al), 329
  - the dissociation between erythrocytes and plasma flow in focal ischemia (Izumiyama et al), 121A
  - hyperglycemia augments infarct size in focal experimental brain ischemia (Brint et al), 127A
  - regional glucose utilization and blood flow following

- graded forebrain ischemia in the rat: correlation with neuropathology (Ginsberg et al), 470
- Ischemia, cerebral**  
baseline hemodynamic state and response to hemodilution in acute cerebral ischemia (Grotta et al), 126A  
comparison of amaurosis fugax and transient cerebral ischemia: a prospective clinical and arteriographic study (Hurwitz et al), 698  
effect of transient cerebral ischemia and hyperosmotic blood-brain barrier disruption on the somatosensory evoked potential (Warnke et al), 141A  
repetitive involuntary movement associated with episodic cerebral ischemia (Yanagihara et al), 244  
selective gene expression in focal cerebral ischemia (Jacewicz et al), 126A  
transient global amnesia: a case-control study (Kushner and Hauser), 684
- Ischemia, perinatal**  
focal disruption of neurotransmitter receptor patterns in basal ganglia after perinatal hypoxic-ischemic encephalopathy (Johnston and Torke), 406A  
perinatal hypoxia-ischemia leads to transient depression of striatal synaptosomal  $^3\text{H}$ -glutamate uptake (Silverstein et al), 380A
- Jakob-Creutzfeldt syndrome. See Creutzfeldt-Jakob disease**
- JC virus**  
progressive multifocal leukoencephalopathy: investigation of three cases using in situ hybridization with JC virus biotinylated DNA probe (Aksamit et al), 490
- Kindling, experimental**  
acute effects of antidepressants on hippocampal seizures (Clifford et al), 692
- Kindling antagonism**  
contrasting effects of 6-hydroxydopamine on kindling antagonism in neonate and adult rats (Konkol et al), 382A
- Korsakoff's syndrome**  
CT and PET findings after onset and resolution of Korsakoff's syndrome due to thalamic hemorrhage (Babikian et al), 128A
- Krabbe's disease**  
Krabbe's disease—computed tomographic and magnetic resonance findings (Baram et al), 399A
- Lactate**  
cerebral lactate and pH in seizures: a  $^1\text{H}$ - $^{31}\text{P}$  NMR study in vivo (Petroff et al), 156A
- Lactic acidosis**  
congenital lactic acidosis due to partial pyruvate dehydrogenase deficiency: neuropathological and clinical correlates (Mikati et al), 397A  
mitochondrial encephalopathy, lactic acidosis, and stroke-like syndrome (MELAS) (Kuriyama and Igata), LETTER, 625; reply (Pavakis et al), LETTER, 626
- Language disturbance**  
language disturbances produced by electrical stimulation of the basal temporal region (Lüders et al), 151A
- Language processing**  
metabolic correlates of language processing in healthy male adults (Brown et al), 119A
- Laryngeal disorders**  
laryngeal control in neurological disease (Spooner et al), 163A
- Laser microprobe analysis**  
intracytoplasmic aluminum accumulation in neurofibrillary tangle-bearing neurons: detection by laser microprobe mass analyzer (Perl et al), 143A
- Lead intoxication, experimental**  
localization of lead in rat peripheral nerve by electron microscopy (Windebank and Dyck), 197
- Leptomeninges**  
leptomeningeal dissemination of primary central nervous system tumors of childhood (Packer et al), 217
- Leucovorin**  
high-dose leucovorin reverses high-dose methotrexate-induced depression of regional cerebral metabolic rate for glucose in the rat (Phillips et al), 404A
- Leukodystrophy, globoid cell**  
Krabbe's disease—computed tomographic and magnetic resonance findings (Baram et al), 399A
- Leukodystrophy, metachromatic**  
bone marrow transplant for metachromatic leukodystrophy (Lipton et al), 399A  
metachromatic leukodystrophy manifesting as a schizophrenic disorder: computed tomographic correlation (Finelli), 94
- Leukoencephalopathy**  
leukoencephalopathy following intracarotid chemotherapy: neuropathology and positron emission tomography (Junck et al), 139A  
leukoencephalopathy in diffuse hemorrhagic cerebral amyloid angiopathy (Gray et al), 54
- Leukoencephalopathy, progressive multifocal**  
electrophysiological findings in progressive multifocal leukoencephalopathy (Lipton et al), 135A  
progressive multifocal leukoencephalopathy: investigation of three cases using in situ hybridization with JC virus biotinylated DNA probe (Aksamit et al), 490  
a quantitation of myelin-associated glycoprotein and myelin basic protein loss in different demyelinating diseases (Gendelman et al), 324
- Leukotrienes**  
leukotrienes increase blood-brain barrier permeability following intraparenchymal injections in rats (Black and Hoff), 349
- Levodopa**  
continuous intraduodenal infusion of levodopa for resistant on-off fluctuations in parkinsonism (Kurlan et al), 139A  
the effect of carbidopa on the pharmacokinetics of intravenously administered levodopa: the mechanism of action in the treatment of parkinsonism (Nutt et al), 537  
lack of progression of MPTP-induced parkinsonism during long-term treatment with L-dopa (Burns et al), 117A  
long-term follow-up on parkinsonian patients receiving early levodopa treatment (Markham and Diamond), 116A  
relation between L-dopa dose, plasma concentrations, and clinical response in fluctuating parkinsonian patients (Nutt et al), 135A
- Lewy body**  
serum protein antigens within Lewy bodies in Parkinson's disease (Pappolla et al), 136A
- Lithium**  
on-off induced malignant hyperthermia (Pfeiffer and Sucha), 138A
- Liver disease**  
liver metastasis and myasthenia gravis twenty-two years after invasive thymoma (Rao et al), 162A  
vitamin E deficiency associated with vision loss and bulbar weakness (Larsen et al), 725
- Lobectomy, temporal**  
comprehension deficits produced by stimulation of Wernicke's area in candidates for temporal lobectomy (Lesser et al), 118A

## Lorazepam

lorazepam for status epilepticus and serial seizures in children: 218 consecutive cases (Crawford and Mitchell), 412A

propranolol-induced tardive dyskinesia in a patient with akathisia (Sandyk), LETTER, 370

rectal lorazepam in the treatment of acute seizures in childhood (Dooley et al), 412A

## Low-birth-weight infant

respiratory complications in low-birth-weight babies who receive phenobarbital (Kuban et al), 379A

## Lumbar puncture

the effect of lumbar puncture on regional cerebral blood flow as determined by positron emission tomography in neonatal posthemorrhagic hydrocephalus (Perlman et al), 379A

## Lupus erythematosus, infantile

myelopathy in neonatal and infantile lupus erythematosus (Kaye and Butler), 392A

## Lymphocyte response, autologous

regulation of the autologous mixed lymphocyte response in multiple sclerosis (Crisp et al), 129A

## Lymphoma, central nervous system

primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 140A

## Lysyl oxidase

serum lysyl oxidase-like activity in muscular dystrophy (Feit and Cook), 162A

## Macroorchidism

fragile X syndrome: associated neurological abnormalities and developmental disabilities (Wisniewski et al), 665

## Magnetic resonance imaging

cerebellar infarction: review of clinical findings and correlation with computed tomography and magnetic resonance imaging (Simmons et al), 125A

clinical features and magnetic resonance images of primary intracranial arachnoid cysts (Gandy et al), 140A

magnetic resonance imaging demonstration of brain tumor in children with complex partial seizures (Kilroy et al), 405A

magnetic resonance imaging in childhood encephalomyelitis (Bale et al), 391A

magnetic resonance imaging in the detection of neurological damage caused by treatment of childhood cancer (Packer et al), 403A

magnetic resonance imaging in pediatric neurological disorders (Roach et al), 415A

magnetic resonance imaging in postinfectious and postvaccinal encephalomyelitis (Belman and Anand), 391A

Marchiafava-Bignami disease: computed tomographic scan and magnetic resonance imaging (Kawamura et al), LETTER, 103

proton magnetic resonance imaging in cerebrovascular disease (Salgado et al), 122A

the use of magnetic resonance imaging in stroke (Kertesz et al), 121A

See also Nuclear magnetic resonance

## Mannitol

acute improvement in exacerbating multiple sclerosis produced by intravenous administration of mannitol (Stefoski et al), 443

## Marchiafava-Bignami disease

Marchiafava-Bignami disease: computed tomographic scan and magnetic resonance imaging (Kawamura et al), LETTER, 103

## Measles

in vivo activated cells in a patient with active multiple sclerosis which were cloned and found to be measles reactive (Noronha), 128A

## Measles encephalomyelitis

a quantitation of myelin-associated glycoprotein and myelin basic protein loss in different demyelinating diseases (Gendelman et al), 324

## Mechanoreceptors, cutaneous

human cutaneous mechanoreceptors during regeneration: physiology and interpretation (Mackel), NEUROLOGICAL PROGRESS, 165

## MEDICOMP

computer-assisted differential diagnosis in neurology—work in progress (Cairncross and Goltra), 148A

## Medulloblastoma

efficacy of combination chemotherapy with lomustine, vincristine, and cisplatin in patients with primitive neuroectodermal tumors—medulloblastoma of childhood (Packer et al), 394A

prognostic importance of expression of cytoskeletal proteins in childhood primitive neuroectodermal tumors (medulloblastoma) (Packer et al), 140A

## Medulloblastoma, experimental

simultaneous measurements of blood flow and permeability in a xenotransplanted human medulloblastoma cell line (Warnke et al), 141A

## MELAS

mitochondrial encephalopathy, lactic acidosis, and stroke-like syndrome (MELAS) (Kuriyama and Igata), LETTER, 625; reply (Pavakis et al), LETTER, 626

## Melkersson-Rosenthal syndrome

the Melkersson-Rosenthal syndrome: a case with increased CNS IgG synthesis (Durelli and Cocito), LETTER, 623

## Membrane proteins

Alzheimer's disease: no alteration in the physical state of erythrocyte membrane glycoconjugates (Butterfield et al), LETTER, 105

## Memory loss

temporal lobe asymmetry of electroencephalographic spectra in patients with memory loss (Vanderzant et al), 154A

## Meningioma

reversible go—no go deficits in a case of frontal lobe tumor (Leimkuhler and Mesulam), 617

## Meningitis, bacterial

movement disorders associated with bacterial meningitis (Breningstall and Burstein), 392A

## Meningoencephalitis

the electroencephalogram in neonatal herpes simplex virus meningoencephalitis (Mikati et al), 409A

## Mental retardation

fragile X syndrome: associated neurological abnormalities and developmental disabilities (Wisniewski et al), 665  
hydrocephalus and mental retardation in craniosynostosis (Noetzel et al), 389A

## Mephobarbital

behavioral effects of phenobarbital and mephobarbital: a randomized double-blind crossover study in children (Young et al), 413A

## Messenger RNA

relative postmortem stability of neuropeptide mRNAs: implications for studies of neurodegenerative disorders (Uhl et al), 149A

## Methotrexate

high-dose leucovorin reverses high-dose methotrexate—

- induced depression of regional cerebral metabolic rate for glucose in the rat (Phillips et al), 404A
- Methylprednisolone**  
azathioprine and steroids are not more effective in decreasing multiple sclerosis intra-blood-brain barrier IgG synthesis than steroids alone (Staugaitis et al), 356
- Metrizamide**  
another report of nonconvulsive status epilepticus after metrizamide myelography (Wagner), LETTER, 369
- Microcephaly**  
neurological complications in infants and children with acquired immune deficiency syndrome (Belman et al), 560
- Microneurography**  
human cutaneous mechanoreceptors during regeneration: physiology and interpretation (Mackel), *NEUROLOGICAL PROGRESS*, 165
- Microscopy, electron**  
localization of lead in rat peripheral nerve by electron microscopy (Windebank and Dyck), 197
- Mitochondria**  
investigation of human mitochondrial myopathies by phosphorus magnetic resonance spectroscopy (Arnold et al), 189  
mitochondrial dysfunction in spinocerebellar and macular degeneration (Peterson et al), 146A  
stroke-like episodes in MERRF (Fukuhara), LETTER, 368
- Motor cortex**  
corticospinal tract conduction time in multiple sclerosis (Mills and Murray), 601
- Motor neuron disease**  
IgM monoclonal protein binding to spinal cord and peripheral nerve glycolipids in a patient with motor neuron disease (Donofrio et al), 161A  
amyotrophic lateral sclerosis: part 1. clinical features, pathology, and ethical issues in management (Tandan and Bradley), *NEUROLOGICAL PROGRESS*, 271
- Motor neuron loss**  
amyotrophic lateral sclerosis: part 2. etiopathogenesis (Tandan and Bradley), *NEUROLOGICAL PROGRESS*, 419
- Movement disorders**  
movement disorders associated with bacterial meningitis (Breningstall and Burstein), 392A  
movement disorders may result from parietal lobe lesions (Gomez et al), 148A  
repetitive involuntary movement associated with episodic cerebral ischemia (Yanagihara et al), 244  
risks of neuroleptic drugs in children with neurological disorders (Silverstein and Johnston), 392A  
an unusual movement disorder associated with tyrosinosis and elevated cerebrospinal fluid catecholamines (Rust et al), 399A
- Moyamoya disease**  
elevated catecholamines in moyamoya disease (Hammond and Huttenlocher), 387A
- MPTP, experimental**  
the MPTP mouse: a model for exploring strategies to promote recovery of nigrostriatal dopaminergic neurons after injury? (Ricaurte et al), 117A
- MPTP exposure**  
lack of progression of MPTP-induced parkinsonism during long-term treatment with L-dopa (Burns et al), 117A
- Multiple sclerosis**  
activity of multiple sclerosis during pregnancy and puerperium (Poser and Poser), LETTER, 101; reply (Korn-Lubetzki et al), LETTER, 101  
acute improvement in exacerbating multiple sclerosis produced by intravenous administration of mannitol (Stefoski et al), 443  
4-aminopyridine improves clinical signs in multiple sclerosis (Stefoski et al), 131A  
azathioprine and steroids are not more effective in decreasing multiple sclerosis intra-blood-brain barrier IgG synthesis than steroids alone (Staugaitis et al), 356  
corticospinal tract conduction time in multiple sclerosis (Mills and Murray), 601  
evoked potential testing in relatives of multiple sclerosis patients (Nuwer et al), 30  
immunological complications in multiple sclerosis patients receiving interferon (Rice et al), 439  
immunoreactive myelin basic protein-like material in urine: development and characterization of the immunoassay (Whitaker et al), 129A  
intensive and chronic cyclophosphamide administration to patients with multiple sclerosis had no major effect on intra-blood-brain-barrier IgG synthesis (Tourtellotte et al), 131A  
in vivo activated cells in a patient with active multiple sclerosis which were cloned and found to be measles reactive (Noronha), 128A  
left ear suppression on verbal dichotic tests in patients with multiple sclerosis (Rubens et al), 459  
multiple sclerosis: activated cells in cerebrospinal fluid in acute exacerbations (Noronha et al), 722  
multiple sclerosis: effect of copolymer I on clinical, intra-blood-brain-barrier, and IgG synthesis variables (Baumhefner et al), 129A  
paroxysmal falling: an unrecognized sign in multiple sclerosis (Sheremata et al), 130A  
phenotypic and functional analysis of T cells cloned directly from the blood and cerebrospinal fluid of patients with multiple sclerosis (Hafler et al), 451  
polymorphonuclear neutral protease activity in multiple sclerosis and other diseases (Guarnieri et al), 620  
a quantitation of myelin-associated glycoprotein and myelin basic protein loss in different demyelinating diseases (Gendelman et al), 324  
quantitative cerebrospinal fluid IgG measurements as a marker of disease activity in multiple sclerosis (Caroscio et al), 130A  
regulation of the autologous mixed lymphocyte response in multiple sclerosis (Crisp et al), 129A  
serial immunological studies in multiple sclerosis patients treated systematically with human alpha interferon (Panitch et al), 434  
structural brain correlates of cognitive and emotional disorder in multiple sclerosis (Rabins et al), 130A
- Muscarinic receptor agonist**  
the cholinergic drug RS 86 does not change cerebral blood flow in patients with Alzheimer's disease (Naber et al), 146A
- Muscle, skeletal**  
heterogeneity of human skeletal muscle tropomyosin (Giometti and Danon), 234
- Muscle contractions**  
thyrotropin-releasing hormone enhances motor neuron-evoked contractions of cultured human muscle (Askanas et al), 716
- Muscle disorders**  
heterogeneity of human skeletal muscle tropomyosin (Giometti and Danon), 234  
muscle weakness and atrophy following prolonged paralysis with pancuronium bromide in neonates (Torres et al), 403A

## Muscle disorders (continued)

- myopathological findings in familial dysautonomia (Shapiro et al), 401A
- Muscle mass**
  - determination of muscle mass change in Duchenne dystrophy using differential absorptiometry (Bolin et al), 158A
- Muscular dystrophy**
  - Fukuyama's congenital muscular dystrophy: variant form with muscle inflammation in a non-Japanese American child (Kohrman et al), 400A
  - lethal cardiomyopathy and central nervous system involvement in a family with X-linked muscular dystrophy (Bergia et al), 402A
  - <sup>31</sup>P NMR studies in Duchenne muscular dystrophy (Younkin et al), 415A
  - serum lysyl oxidase-like activity in muscular dystrophy (Feit and Cook), 162A
- Myasthenia gravis**
  - clinical characteristics of early-onset autoimmune myasthenia gravis and persistent neonatal myasthenia gravis (Roach et al), 401A
  - failure of stapedius reflexometry in the diagnosis of myasthenia gravis (Oosterhuis et al), LETTER, 519
  - liver metastasis and myasthenia gravis twenty-two years after invasive thymoma (Rao et al), 162A
  - monoclonal antibodies to acetylcholine receptor secreted by human × human hybridomas derived from lymphocytes of a patient with myasthenia gravis (Blair et al), 120A
  - ocular myasthenia: diagnosis and treatment (Kupersmith et al), 159A
  - quinidine exacerbating myasthenia gravis: a case report and intracellular recordings (Shy et al), 120A
- Myasthenic syndrome**
  - dominantly inherited congenital myasthenic syndrome: report of a new multigenerational pedigree (Chutkow et al), 159A
- Myelin**
  - leukoencephalopathy in diffuse hemorrhagic cerebral amyloid angiopathy (Gray et al), 54
  - sharing of antigenic determinants between myelin and enteric bacteria (Dieperink et al), 129A
- Myelin-associated glycoprotein**
  - characterization of oligosaccharides that bind to anti-myelin-associated glycoprotein M proteins (Shy et al), 129A
  - generation of human B-cell hybridomas secreting anti-MAG proteins from patients with neuropathy (Spatz et al), 160A
  - immunofluorescence study of patients with neuropathy and IgM M proteins (Takatsu et al), 173
- Myelinated fibers**
  - cellular mechanism of fiber pathologies in ischemic neuropathy (Nukada and Dyck), 156A
- Myelin basic protein**
  - immunoreactive myelin basic protein-like material in urine: development and characterization of the immunoassay (Whitaker et al), 129A
  - noncontamination of proteolipid protein preparations by MBP (Lees and Cambi), LETTER, 268
  - phenotypic and functional analysis of T cells cloned directly from the blood and cerebrospinal fluid of patients with multiple sclerosis (Hafler et al), 451
  - a quantitation of myelin-associated glycoprotein and myelin basic protein loss in different demyelinating diseases (Gendelman et al), 324
- Myelitis, ascending**
  - cytomegalovirus and herpes simplex virus ascending my-

elitis in a patient with acquired immune deficiency syndrome (Tucker et al), 74

## Myelography

- another report of nonconvulsive status epilepticus after metrizamide myelography (Wagner), LETTER, 369

## Myelopathy

- myelopathy in neonatal and infantile lupus erythematosus (Kaye and Butler), 392A

## Myocardial damage

- cardiovascular regulation and lesions of the central nervous system (Talman), NEUROLOGICAL PROGRESS, 1

## Myoclonic dystonia

- inherited myoclonic dystonia (Kurlan et al), 162A

## Myoclonus

- antineurofilament protein antibodies in a child with opsoclonus-myoclonus (Noetzel et al), 403A
- clinical manifestations and pharmacological treatment of segmental myoclonus (Pardo and Jankovic), 135A
- outcome after cardiopulmonary resuscitation: relation to seizures and myoclonus (Krumholz et al), 152A
- sustained myoclonus in a woman with startle epilepsy (Bejar et al), LETTER, 101
- syndrome of opsoclonus-myoclonus in hyperosmolar non-ketotic coma (Matsumura et al), LETTER, 623

## Myopathy, centronuclear

- profound congestive heart failure as the presentation of centronuclear myopathy (Gospe et al), 401A

## Myopathy, lipid

- in vivo studies of human lipid myopathies by <sup>31</sup>P magnetic resonance imaging (Argov et al), 119A

## Myorhythmia, oculomasticatory

- oculomasticatory myorhythmia: a sign of Whipple's disease (Schwartz et al), 135A

## Myositis, experimental autoimmune

- experimental autoimmune myositis in SJL/J mice (Rosenberg et al), 161A

## Myotonia, molecular abnormalities of

- molecular mechanisms of myotonia. studies with phenytoin, α-D-fluoromethylornithine, and methylglyoxal bis-(guanyldrazone) (Koenig et al), 157A

## Naloxone

- the effects of naloxone in Tourette's syndrome (Sandyk), LETTER, 367

## Naming ability

- naming ability and strategies in hyperlexic children (Voeller), 393A

## Narcolepsy, posttraumatic

- posttraumatic narcolepsy: report of three patients studied with polysomnography (Roeltgen et al), 154A

## Natriuresis

- volume depletion and natriuresis in patients with a ruptured intracranial aneurysm (Wijdicks et al), 211

## Navajo population

- a new hereditary sensory autonomic neuropathy in a Navajo population (Johnsen et al), 400A

## Nearfield sonography

- diagnosis of cerebral atrophy in infants by the nearfield method: a new technique in cranial sonography (Fischer), 410A

## Necrosis, neuronal, experimental

- status epilepticus in well-oxygenated rats causes neuronal necrosis (Nevander et al), 281

## Neocortex

- status epilepticus in well-oxygenated rats causes neuronal necrosis (Nevander et al), 281

## Neoplasms, brain. See Brain neoplasms

- Neoplasms, frontal lobe  
bilateral asterix in frontal tumor (Noda and Umezaki), LETTER, 366  
reversible go-no go deficits in a case of frontal lobe tumor (Leimkuhler and Mesulam), 617
- Neoplasms, nervous system  
opposite gradients of cytoplasmic RNA in the neuronal and glial series of nervous system tumors in children (Sarnat et al), 404A
- Neoplasms, neuroectodermal  
efficacy of combination chemotherapy with lomustine, vincristine, and cisplatin in patients with primitive neuroectodermal tumors—medulloblastoma of childhood (Packer et al), 394A
- Neoplasms, spinal cord  
outcome of children with primary intramedullary spinal cord tumors (Hardison et al), 395A
- Neoplasms, systemic  
incidence, presentation, and outcome of spinal cord disease in children with systemic cancer (Lewis et al), 405A
- Nerve conduction defect, motor  
reversible diabetic nerve dysfunction: structural correlates to electrophysiological abnormalities (Sima and Brismar), 21
- Nerve conduction time  
corticospinal tract conduction time in multiple sclerosis (Mills and Murray), 601
- Nerve conduction velocity, experimental  
the structural basis for irreversible diabetic nerve dysfunction (Sima et al), 163A
- Nerve growth factor  
nerve growth factor is a potent signal for cholinergic neurons in neonatal brain (Johnston et al), 382A
- Nerve regeneration  
human cutaneous mechanoreceptors during regeneration: physiology and interpretation (Mackel), NEUROLOGICAL PROGRESS, 165  
in vitro studies of fetal and adult central nervous system regeneration (Whelan), 380A
- Neural tube defects, animal  
identification of neural tube defects in the chick embryo (Campbell and Sohal), 389A
- Neurofibromatosis  
iris hamartomas as diagnostic criterion in neurofibromatosis (Boltschauser et al), 415A  
tissue culture studies of neurofibromatosis: effects of axolemmal fragments and cyclic adenosine 3',5'-monophosphate analogues on proliferation of Schwann-like and fibroblast-like neurofibroma cells (Sobue et al), 68
- Neuroleptics  
concomitant neuroleptic and antimuscarinic treatment: binding and biochemistry (Goetz et al), 150A  
effects of chloramphenicol on supersensitivity induced by chronic administration of neuroleptic agents (Friedman and Giambalvo), 138A  
risks of neuroleptic drugs in children with neurological disorders (Silverstein and Johnston), 392A
- Neurological disorders, childhood  
magnetic resonance imaging in pediatric neurological disorders (Roach et al), 415A
- Neurological status, neonatal  
continuous monitoring of neonatal electroencephalogram processed by a power spectrum analyzer (Zalneraitis et al), 409A
- Neuromuscular disorders  
congenital diaphragm paresis: a marker of generalized neuromuscular disease? (Leshner and Campbell), 401A  
investigation of human mitochondrial myopathies by phosphorus magnetic resonance spectroscopy (Arnold et al), 189  
neuromuscular complications in association with acquired immune deficiency syndrome (Simpson et al), 160A  
neuromuscular diseases with positive contracture tests (Heiman-Patterson et al), 158A
- Neuronal uptake, decreased sympathetic  
decreased sympathetic neuronal uptake in idiopathic orthostatic hypotension (Polinsky et al), 48
- Neurons, abnormality of  
neuronal and dendritic abnormalities in a child with the maternal phenylketonuria syndrome (Lacey and Terplan), 384A
- Neuropathy, ischemic  
cellular mechanism of fiber pathologies in ischemic neuropathy (Nukada and Dyck), 156A
- Neurotoxic treatment, cancer  
magnetic resonance imaging in the detection of neurological damage caused by treatment of childhood cancer (Packer et al), 403A
- Neurotransmitters  
blockade of synaptic transmission protects rat hippocampal slice from hypoxia (Clark et al), 385A  
focal disruption of neurotransmitter receptor patterns in basal ganglia after perinatal hypoxic-ischemic encephalopathy (Johnston and Torke), 406A  
neurotransmitter receptor alterations in Huntington's disease: autoradiographic and homogenate studies with special reference to benzodiazepine receptor complexes (Whitehouse et al), 202  
neurotransmitter receptor distributions in human cerebral cortex (Uhl and Whitehouse), 117A
- Nifedipine  
malignant hyperthermic reaction to nifedipine in a child with Schwartz-Jampel syndrome (Cook and Henderson-Tilton), 402A
- Nigrostriatal pathway  
stress-induced neurological impairments in an animal model of parkinsonism (Snyder et al), 544
- Nimodipine  
effect of pretreatment with the calcium antagonist nimodipine on local cerebral blood flow and histopathology after middle cerebral artery occlusion (Mohamed et al), 705
- NINCDS Stroke Data Bank  
predictors of 30-day mortality in intracerebral hemorrhage: the NINCDS Stroke Data Bank (Tuhim et al), 126A
- Nonepileptogenic epileptiform activity  
nonepileptogenic epileptiform electroencephalographic activity (Klass and Westmoreland), NEUROLOGICAL PROGRESS, 627
- Noradrenergic fibers  
lasting reorganization of noradrenergic fibers in the cerebellar cortex of Purkinje cell degeneration mice (Felten et al), 145A
- Norepinephrine  
cerebral norepinephrine depletion enhances recovery after brain ischemia (Busto et al), 329  
decreased sympathetic neuronal uptake in idiopathic orthostatic hypotension (Polinsky et al), 48  
ultrastructure of monoamine-containing fibers in the cerebellar cortex of Purkinje cell degeneration mutant mice (Triarhou et al), 145A
- Nuclear magnetic resonance  
cerebral lactate and pH in seizures: a  $^1\text{H}$ - $^{31}\text{P}$  NMR study in vivo (Petroff et al), 156A

## Nuclear magnetic resonance (*continued*)

- investigation of human mitochondrial myopathies by phosphorus magnetic resonance spectroscopy (Arnold et al), 189
- effect of hypoxemia on prolonged neonatal seizures: a  $^{31}\text{P}$  nuclear magnetic resonance study (Young et al), 378A
- in vivo exercise kinetics in human muscle glycolytic defects studied by  $^{31}\text{P}$ -magnetic resonance imaging spectroscopy (Argov et al), 162A
- in vivo studies of human lipid myopathies by  $^{31}\text{P}$  magnetic resonance imaging (Argov et al), 119A
- $^{31}\text{P}$  NMR studies in Duchenne muscular dystrophy (Younkin et al), 415A
- $^{31}\text{P}$  NMR study of cerebral metabolism during prolonged seizures in the neonatal dog (Young et al), 14
- proton nuclear magnetic resonance imaging in Huntington's disease (Sax et al), 142A
- See also* Magnetic resonance imaging
- Nucleus basalis of Meynert
  - abnormalities of the nucleus basalis in Down's syndrome (Casanova et al), 310
- Nucleus ventralis posterolateralis, thalamic
  - compulsive self-stimulation of the nucleus ventralis posterolateralis: studies of behavior, endocrine response, regional cerebral metabolic rate for glucose, electroencephalogram, and evoked potentials (Portenoy et al), 119A
- Obituary

  - oculosympathetic dysfunction: effects on arcus senilis (Dagen and Appenzeller), 150A
- OKT4 phenotypes
  - multiple sclerosis: activated cells in cerebrospinal fluid in acute exacerbations (Noronha et al), 722
- Oligoclonal bands
  - evoked potential testing in relatives of multiple sclerosis patients (Nuwer et al), 30
- Oligoclonal IgG
  - azathioprine and steroids are not more effective in decreasing multiple sclerosis intra-blood-brain barrier IgG synthesis than steroids alone (Staugaitis et al), 356
- Oligodendrocyte infection
  - herpes simplex virus infection of isolated human oligodendrocytes (Kastrukoff and Kim), 132A
- Oligosaccharides
  - characterization of oligosaccharides that bind to anti-myelin-associated glycoprotein M proteins (Shy et al), 129A
- Olivopontocerebellar atrophy
  - infantile spinal muscular atrophy with olivopontocerebellar atrophy (Chou et al), 402A

## On-off episodes

- continuous intraduodenal infusion of levodopa for resistant on-off fluctuations in parkinsonism (Kurlan et al), 139A
- on-off induced malignant hyperthermia (Pfeiffer and Sucha), 138A
- Ophthalmoplegia, chronic
  - three siblings with chronic progressive ophthalmoplegia and recurrent stroke-like illness (Matsuo et al), 158A
- Opioid treatment
  - opioid responsiveness of neuroleptic-induced akathisia (Walters et al), 137A
- Opsoclonus
  - antineurofilament protein antibodies in a child with opsoclonus-myoclonus (Noetzel et al), 403A
  - syndrome of opsoclonus-myoclonus in hyperosmolar nonketotic coma (Matsumura et al), LETTER, 623
- Optic neuritis
  - visually evoked responses in optic neuritis before and after pulse steroid therapy (Guy et al), 131A
- Organ of Corti
  - the auditory pathology of brain death as revealed by auditory evoked potentials (Kaga et al), 360
- Pain
  - pain and paresthesias of primary sensory unit origin. documentation of ectopic impulse generation through microneurography in patients (Ochoa et al), 156A
- Pancuronium bromide
  - muscle weakness and atrophy following prolonged paralysis with pancuronium bromide in neonates (Torres et al), 403A
- Paralysis
  - clinical features of postictal paralysis (Rolak), 152A
- Paralysis, infantile
  - muscle weakness and atrophy following prolonged paralysis with pancuronium bromide in neonates (Torres et al), 403A
- Paraproteinemia
  - monoclonal IgM in a patient with paraproteinemic polyneuropathy binds to gangliosides containing disialosyl groups (Ilyas et al), 655
- Paresis, infantile diaphragm
  - congenital diaphragm paresis: a marker of generalized neuromuscular disease? (Leshner and Campbell), 401A
- Paresthesias, sensory
  - pain and paresthesias of primary sensory unit origin. documentation of ectopic impulse generation through microneurography in patients (Ochoa et al), 156A
- Parietal lobe lesions
  - movement disorders may result from parietal lobe lesions (Gomez et al), 148A
- Parkinson's disease
  - continuous intraduodenal infusion of levodopa for resistant on-off fluctuations in parkinsonism (Kurlan et al), 139A
  - the effect of carbidopa on the pharmacokinetics of intravenously administered levodopa: the mechanism of action in the treatment of parkinsonism (Nutt et al), 537
  - identification of environmentally related foci of Parkinson's disease in the Province of Quebec (Barbeau and Roy), 138A
  - lack of progression of MPTP-induced parkinsonism during long-term treatment with L-dopa (Burns et al), 117A
  - lateral hypothalamic dysfunction in Parkinson's disease (der Linden et al), 137A
  - long-term efficacy of pergolide in patients with Parkinson's disease (Sage and Duvoisin), 137A

- long-term follow-up on parkinsonian patients receiving early levodopa treatment (Markham and Diamond), 116A
- monozygotic twins with Parkinson's disease (Koller et al), 136A
- neuropathological correlation of eye movement abnormalities in idiopathic Parkinson's disease (Hunter and Guy), 136A
- parkinsonism-dystonia complex (Klawans and Paleologos), 135A
- pharmacokinetics of trihexyphenidyl after short-term and long-term administration to dystonic patients (Burke and Fahn), 35
- preservation of hypothalamic dopaminergic neurons in Parkinson's disease (Matzuk and Saper), 552
- relation between L-dopa dose, plasma concentrations, and clinical response in fluctuating parkinsonian patients (Nutt et al), 135A
- serum protein antigens within Lewy bodies in Parkinson's disease (Pappolla et al), 136A
- Parkinson's disease, experimental
- stress-induced neurological impairments in an animal model of parkinsonism (Snyder et al), 544
- Pedunculopontine nucleus neurons
- loss of putative cholinergic neurons of the pedunculopontine nucleus in progressive supranuclear palsy (Zweig et al), 144A
- Peptide neurotransmitters
- relative postmortem stability of neuropeptide mRNAs: implications for studies of neurodegenerative disorders (Uhl et al), 149A
- Perfusion, regional
- reversibility of cerebral hypoperfusion and brain atrophy in Wernicke-Korsakoff syndrome (Meyer et al), 142A
- Pergolide
- long-term efficacy of pergolide in patients with Parkinson's disease (Sage and Duvoisin), 137A
- Peripheral nerve injury
- human cutaneous mechanoreceptors during regeneration: physiology and interpretation (Mackel), *NEUROLOGICAL PROGRESS*, 165
- Peripheral nervous system
- in vitro studies on axon-Schwann cell interaction (Tennekoon et al), 390A
- Peripheral neuropathy
- the clinical spectrum of necrotizing angiopathy of the peripheral nervous system (Kissel et al), 251
- Peripheral neuropathy, experimental
- localization of lead in rat peripheral nerve by electron microscopy (Windebank and Dyck), 197
- Pharmacokinetics
- comparison of the relative bioavailability and pharmacokinetics of carbamazepine tablets and chewable tablet formulations (Maas et al), 379A
- Phenobarbital
- behavioral effects of phenobarbital and mephobarbital: a randomized double-blind crossover study in children (Young et al), 413A
  - respiratory complications in low-birth-weight babies who receive phenobarbital (Kuban et al), 379A
- Phenotypes, antitrypsin
- $\alpha$ -1 antitrypsin phenotypes in demyelinating disease: an association between demyelinating disease and the allele PiM3 (McCombe et al), 514
- Phenylketonuria
- neuronal and dendritic abnormalities in a child with the maternal phenylketonuria syndrome (Lacey and Terplan), 384A
- Phenytoin
- the clinical value of free phenytoin levels (Theodore et al), 90
  - transient chorea induced by phenytoin (Filloux and Thompson), 412A
- Phosphorylated neurofilaments
- phosphorylated neurofilaments in neurons in aluminum intoxication (Troncoso et al), 149A
- Picornavirus RNA
- detection of picornavirus sequences in nervous tissue of amyotrophic lateral sclerosis and control patients (Brahic et al), 337
- Pituitary gland, anterior
- regulation of anterior pituitary calcium flux by somatostatin (Login and Judd), 151A
- Plasma cell dyscrasia
- neuropathy and anti-myelin-associated glycoprotein IgM M proteins: T cell regulation of M protein secretion in vitro (Latov et al), 182
- Plasma flow
- the dissociation between erythrocytes and plasma flow in focal ischemia (Izumiyama et al), 121A
- Plasma prolactin
- nocturnal plasma prolactin rise in patients with complex partial seizures (Molaie et al), 719
- Plasma volume
- volume depletion and natriuresis in patients with a ruptured intracranial aneurysm (Wijdicks et al), 211
- Plasminogen
- plasminogen activator and basement membrane degradation in denervated muscle: possible role as negative trophic factor in amyotrophic lateral sclerosis (Festoff et al), 159A
  - stroke in a young adult with a familial plasminogen disorder (Furlan et al), 122A
- P300-like potentials
- the emergence of P300 in the alert monkey in an auditory oddball paradigm (Onofri et al), 155A
- Pneumothorax, infantile
- pneumothorax and intraventricular hemorrhage in preterm infants: pneumothorax is associated with intraventricular hemorrhage only if there is concomitant severe acidosis and/or hypercarbia (Shields et al), 407A
- Polyamines
- molecular mechanisms of myotonia. studies with phenytoin,  $\alpha$ -D-fluoromethylornithine, and methylglyoxal bis-(guanyldrazone) (Koenig et al), 157A
  - polyamines as neuronal signals mediating epileptic seizures (Koenig and Iqbal), 155A
- Polymorphonuclear cell proteases
- polymorphonuclear neutral protease activity in multiple sclerosis and other diseases (Guarnieri et al), 620
- Polyneuropathy
- acute inflammatory demyelinating polyneuropathy in the acquired immune deficiency syndrome (Mishra et al), 131A
  - the clinical spectrum of necrotizing angiopathy of the peripheral nervous system (Kissel et al), 251
  - immunofluorescence study of patients with neuropathy and IgM M proteins (Takatsu et al), 173
  - monoclonal IgM in a patient with paraproteinemic polyneuropathy binds to gangliosides containing disialosyl groups (Ilyas et al), 655
  - polyneuropathy in critical illness: pathological features (Zochodne et al), 160A
- Positron emission tomography. *See* Tomography, emission computed

- Posture, stability of  
postural stability—effect of normal aging (Glatt et al), 136A
- Pregnancy  
activity of multiple sclerosis during pregnancy and puerperium (Poser and Poser), LETTER, 101; reply (Korn-Lubetzki et al), LETTER, 101  
ischemic cerebrovascular disease in the young adult: emergence of oral contraceptive use and pregnancy as the major risk factors in the 1980s (Brick and Riggs), 125A
- Primidone  
efficacy of primidone in essential tremor (Koller), 137A  
treatment of essential tremor—further comment (Young), LETTER, 368; reply (Koller), LETTER, 369
- Progressive supranuclear palsy  
dopaminergic and cholinergic lesions in progressive supranuclear palsy (Ruberg et al), 523  
progressive supranuclear palsy: relationship between extrapyramidal disturbances, dementia, and brain neurotransmitter markers (Kish et al), 530
- Progressive supranuclear palsy, experimental  
loss of putative cholinergic neurons of the pedunculopontine nucleus in progressive supranuclear palsy (Zweig et al), 144A
- Prolactin  
serum prolactin and cortisol levels in evaluation of pseudoepileptic seizures (Pritchard et al), 87
- Prolactinoma  
escape from bromocriptine (Kupersmith et al), 142A
- Propranolol  
propranolol-induced tardive dyskinesia in a patient with akathisia (Sandyk), LETTER, 370  
treatment of essential tremor—further comment (Young), LETTER, 368; reply (Koller), LETTER, 369
- Prosopagnosia  
the inferior longitudinal fasciculus: a reexamination in humans and monkeys (Tusa and Ungerleider), 583  
strategy for facial scanning in impairments of facial recognition (Rizzo et al), 147A
- Prostaglandins, cerebral  
beagle pup model of perinatal cerebral infarction: acute changes in regional cerebral prostaglandins during hemorrhagic hypotension (Ment et al), 408A
- Protease activity  
polymorphonuclear neutral protease activity in multiple sclerosis and other diseases (Guarnieri et al), 620
- Protein hypersensitivity  
acute hemiplegia and seizures in infancy: manifestation of a hypersensitivity reaction to ingested protein (Davis and Cannon), 391A
- Proteolipid protein  
noncontamination of proteolipid protein preparations by MBP (Lees and Cambi), LETTER, 268
- Proteolytic cleavage  
the role of proteolytic cleavage in Theiler's murine encephalomyelitis virus demyelinating disease (Nitayaphan et al), 133A
- Protoporphyrin  
false-positive free erythrocyte protoporphyrin from valproic acid (Crosley et al), 413A
- Psychosis  
psychosis in patients with dementia of the Alzheimer type (Mayeux et al), 144A
- Puberty  
effect of puberty on epilepsy (Diamantopoulos and Crumrine), 411A
- Puerperium  
activity of multiple sclerosis during pregnancy and puerperium (Poser and Poser), LETTER, 101; reply (Korn-Lubetzki et al), LETTER, 101
- Pupils, dilated  
acute traumatic midbrain hemorrhage (Ropper and Miller), 80
- Purkinje cell antigen  
autoimmune response of patients with paraneoplastic cerebellar degeneration to a Purkinje cell cytoplasmic protein antigen (Jaekle et al), 592
- Purkinje cell degeneration  
a quantitative study of the granule cells in the Purkinje cell degeneration mutant (Triarhou et al), 146A  
ultrastructural study of Purkinje cell degeneration in aluminum encephalopathy (Ghetti et al), 143A
- Purkinje cell degeneration, experimental  
lasting reorganization of noradrenergic fibers in the cerebellar cortex of Purkinje cell degeneration mice (Felten et al), 145A  
ultrastructure of monoamine-containing fibers in the cerebellar cortex of Purkinje cell degeneration mutant mice (Triarhou et al), 145A
- Pyramidal tracts  
corticospinal tract conduction time in multiple sclerosis (Mills and Murray), 601  
neurological complications in infants and children with acquired immune deficiency syndrome (Belman et al), 560
- Pyruvate dehydrogenase deficiency  
congenital lactic acidosis due to partial pyruvate dehydrogenase deficiency: neuropathological and clinical correlates (Mikati et al), 397A
- Pyruvate metabolism  
a serial study of patients with pyruvate dysmetabolism (Riviello et al), 397A
- Quinidine  
quinidine exacerbating myasthenia gravis: a case report and intracellular recordings (Shy et al), 120A
- Radiation, whole brain  
positron emission tomographic measurement of blood-to-brain and blood-to-tumor transport of  $^{82}\text{Rb}$ : the effect of dexamethasone and whole-brain radiation therapy (Jarden et al), 636
- Radiculopathy, lumbosacral  
nocturnal cramp in chronic lumbosacral radiculopathies (Baruah), 161A
- Radioimmunoassay  
serum creatine kinase B after radiographic procedures with contrast media (Pfeiffer et al), 126A
- Radiotherapy  
leptomeningeal dissemination of primary central nervous system tumors of childhood (Packer et al), 217  
treatment of central nervous system sarcoidosis with radiotherapy (Bejar et al), 258
- Ragged red fibers  
stroke-like episodes in MERRF (Fukuhara), LETTER, 368
- Reaction time  
central reaction time in normal aging (Smith et al), 145A
- Receptors, opiate  
the effects of naloxone in Tourette's syndrome (Sandyk), LETTER, 367
- Reflex response  
failure of stapedius reflexometry in the diagnosis of myasthenia gravis (Oosterhuis et al), LETTER, 519
- Respiratory disease  
respiratory complications in low-birth-weight babies who receive phenobarbital (Kuban et al), 379A

## Respiratory patterns

Rett's syndrome: polygraphic electroencephalographic-video characterization of sleep and respiratory patterns during sleep and wakefulness (Glaze et al), 417A

## Reticular formation

the extent of injury to the reticular formation that is necessary to produce coma (Ruff and Spence), 125A

## Rett's syndrome

electroencephalographic abnormalities in Rett's syndrome (Trauner and Haas), 394A

is Rett's syndrome a disorder of carbohydrate metabolism? hyperpyruvicacidemia and treatment by ketogenic diet (Haas and Rice), 418A

Rett's syndrome: polygraphic electroencephalographic-video characterization of sleep and respiratory patterns during sleep and wakefulness (Glaze et al), 417A

## Reye's syndrome

citrate synthase inhibition by acyl coenzyme A esters (Evangelidou et al), 383A

new ultrastructural changes in white blood cells and brain in Reye's syndrome (Murphy et al), 398A

serum dicarboxylic acids as uncouplers in Reye's syndrome (Tongsgard and Getz), 383A

## Reye's syndrome, experimental

influenza B virus model of Reye's syndrome in mice: the effect of aspirin (Davis et al), 556

influenza virus model of Reye's syndrome in mice: antiviral studies (Davis and Wallace), 133A

## Reynaud's disease

Reynaud's phenomenon and entrapment neuropathies (Serra et al), LETTER, 519

## RNA

neuronal ribonucleic acid during normal brain development and in cerebral dysgenesis (Sarnat), 386A

opposite gradients of cytoplasmic RNA in the neuronal and glial series of nervous system tumors in children (Sarnat et al), 404A

relative postmortem stability of neuropeptide mRNAs: implications for studies of neurodegenerative disorders (Uhl et al), 149A

## Rubidium transport

positron emission tomographic measurement of blood-to-brain and blood-to-tumor transport of  $^{82}\text{Rb}$ : the effect of dexamethasone and whole-brain radiation therapy (Jarden et al), 636

## Sarcoidosis, central nervous system

treatment of central nervous system sarcoidosis with radiotherapy (Bejar et al), 258

## Schizophrenia

cerebral ventricular enlargement as a biological marker of schizophrenia (LeWitt et al), 147A

metachromatic leukodystrophy manifesting as a schizophrenic disorder: computed tomographic correlation (Finelli), 94

## Schwann cells

in vitro studies on axon-Schwann cell interaction (Tennekoon et al), 390A

tissue culture studies of neurofibromatosis: effects of axolemmal fragments and cyclic adenosine 3',5'-monophosphate analogues on proliferation of Schwann-like and fibroblast-like neurofibroma cells (Sobue et al), 68

## Schwartz-Jampel syndrome

malignant hyperthermic reaction to nifedipine in a child with Schwartz-Jampel syndrome (Cook and Henderson-Tilton), 402A

## Sciatic neuropathy

sciatic neuropathies in children: report of 9 cases (Jones and Gianturco), 158A

## Scrapie

an evaluation of a zoonotic hypothesis for a slow viral infection (Davanipour et al), 134A

scrapie-specific proteins vary in different hosts (Bendheim et al), 134A

## Seizures

central nervous system involvement in cat scratch disease (Lewis and Tucker), 392A

computed tomography and the first seizure of adults (Gordon et al), 153A

episodic dyscontrol: a seizure manifestation in children? (Jabbour), 414A

outcome after cardiopulmonary resuscitation: relation to seizures and myoclonus (Krumholz et al), 152A

risk factors for adult-onset first seizures (Ng et al), 153A

stridor presenting as the sole manifestation of seizures (Maytal and Resnick), 414A

total corpus callosum resection in three children with intractable seizures (Murphy et al), 411A

urinary sialic acid excretion in patients evaluated for seizures, dementia, and/or severe developmental delay (Carroll et al), 411A

valproic acid: supratherapeutic levels (Hurst), 378A

## Seizures, childhood

biotinidase deficiency: initial clinical features and rapid diagnosis (Wolf et al), 614

changes in epileptic spike configuration and prediction of response to medical treatment of childhood seizures (Frost et al), 210A

do seizures in children cause intellectual deterioration (Erlenberg et al), 389A

lorazepam for status epilepticus and serial seizures in children: 218 consecutive cases (Crawford and Mitchell), 412A

rectal lorazepam in the treatment of acute seizures in childhood (Dooley et al), 412A

## Seizures, experimental

acute effects of antidepressants on hippocampal seizures (Clifford et al), 692

cerebral lactate and pH in seizures: a  $^1\text{H}$ - $^{31}\text{P}$  NMR study in vivo (Petroff et al), 156A

polyamines as neuronal signals mediating epileptic seizures (Koenig and Iqbal), 155A

preferential blood flow to brainstem during generalized seizures in newborn monkeys is not coupled to metabolic activation (Fujikawa et al), 152A

## Seizures, neonatal

acute hemiplegia and seizures in infancy: manifestation of a hypersensitivity reaction to ingested protein (Davis and Cannon), 391A

brain tumors presenting as a seizure disorder in infants (Rutledge et al), 396A

effect of hypoxemia on prolonged neonatal seizures: a  $^{31}\text{P}$  nuclear magnetic resonance study (Young et al), 378A

## Seizures, pseudoepileptic

serum prolactin and cortisol levels in evaluation of pseudoepileptic seizures (Pritchard et al), 87

## Seizures, self-abatement of

self-abatement of complex partial seizures (Pritchard et al), 265

## Sensorimotor neuropathy

a new hereditary sensory autonomic neuropathy in a Navajo population (Johnsen et al), 400A

## Shock, hemorrhagic

hemorrhagic shock and encephalopathy in infancy (Chavez-Carballo et al), 416A

## Sialic acid

Alzheimer's disease: no alteration in the physical state of erythrocyte membrane glycoconjugates (Butterfield et al), LETTER, 105

urinary sialic acid excretion in patients evaluated for seizures, dementia, and/or severe developmental delay (Carroll et al), 411A

## Sialosyls

monoclonal IgM in a patient with paraproteinemic polyneuropathy binds to gangliosides containing disialosyl groups (Ilyas et al), 655

## Sickle cell disease

cerebral infarction in sickle cell trait (Greenberg and Massey), 354

## Sleep

diabetic autonomic dysfunction, blood pressure, and sleep (Guilleminault et al), 670

Rett's syndrome: polygraphic electroencephalographic-video characterization of sleep and respiratory patterns during sleep and wakefulness (Glaze et al), 417A

## Sleep, REM, infantile

maturation of rapid eye movement density in preterm infants' active sleep (Reiman et al), 409A

## Slow virus diseases

an evaluation of a zoonotic hypothesis for a slow viral infection (Davanipour et al), 134A

## Sodium permeability, impaired

reversible diabetic nerve dysfunction: structural correlates to electrophysiological abnormalities (Sima and Brismar), 21

## Somatostatin

regulation of anterior pituitary calcium flux by somatostatin (Login and Judd), 151A

## Sonography, cranial

diagnosis of cerebral atrophy in infants by the nearfield method: a new technique in cranial sonography (Fischer), 410A

neonatal neurosonographic correlates of cerebral palsy in preterm infants (Graziani et al), 410A

## Spasms, infantile

immunological evaluation of patients with infantile spasms (Hrachovy et al), 414A

infantile spasms secondary to unilateral cerebral infarcts (Alvarez et al), 414A

## Spike-and-wave bursts

3-Hz spike-and-wave bursts of human generalized epilepsy and 14-Hz sleep spindles share a common brain mechanism (Kellaway and Frost), 154A

## Spinal accessory nerve

the spinal accessory nerve in hemiplegia (Marcus), 388A

## Spinal cord disorders

incidence, presentation, and outcome of spinal cord disease in children with systemic cancer (Lewis et al), 405A

## Spinocerebellar degeneration

two cases of slowly progressive spinocerebellar degeneration with polyneuropathy associated with ceroid lipofuscinosis in one family (Wisniewski et al), 400A

## Spiromustine

central cholinergic blockade by spiromustine studied by positron emission tomography (Staunton et al), 118A  
severe cholinotoxicity of spiromustine therapy in brain tumor patients: its reversibility and implications in glioma treatment (Staunton et al), 141A

## Stapedius reflexometry

failure of stapedius reflexometry in the diagnosis of myasthenia gravis (Oosterhuis et al), LETTER, 519

## Startle reaction

new observations in the syndrome of familial congenital stiffness and excessive startle (Zalneraitis et al), 402A

sustained myoclonus in a woman with startle epilepsy (Bejar et al), LETTER, 101

## Status epilepticus

complex partial seizures of frontal lobe origin (Williamson et al), 497

lorazepam for status epilepticus and serial seizures in children: 218 consecutive cases (Crawford and Mitchell), 412A

## Status epilepticus, experimental

cardiac dysfunction during status epilepticus in the neonatal pig (Young et al), 291

status epilepticus in well-oxygenated rats causes neuronal necrosis (Nevander et al), 281

## Status epilepticus, nonconvulsive

another report of nonconvulsive status epilepticus after metrizamide myelography (Wagner), LETTER, 369

## Stereopsis impairment

impairment of stereopsis with focal brain lesions (Rizzo and Damasio), 147A

## Steroid therapy

isolated angitis of the central nervous system (Craven and French), 263

visually evoked responses in optic neuritis before and after pulse steroid therapy (Guy et al), 131A

## Sterol biosynthetic pathway

obligatory relationship between the sterol biosynthetic pathway and deoxyribonucleic acid synthesis in central nervous system glia (Langan and Volpe), 384A

## Stiffness, congenital

new observations in the syndrome of familial congenital stiffness and excessive startle (Zalneraitis et al), 402A

## Stress

stress-induced neurological impairments in an animal model of parkinsonism (Snyder et al), 544

## Striatal alterations

regional glucose utilization and blood flow following graded forebrain ischemia in the rat: correlation with neuropathology (Ginsberg et al), 470

## Stridor

stridor presenting as the sole manifestation of seizures (Maytal and Resnick), 414A

## Stroke, infantile

Takayasu arteritis: a treatable cause of stroke in infancy (Kohrman and Huttenlocher), 386A

## Stroke diagnosis

the use of magnetic resonance imaging in stroke (Kertesz et al), 121A

## Stroke incidence

stroke in Rochester, Minnesota, since 1935 (Homer and Whisnant), 123A

## Strokelike illness

strokelike episodes in MERRF (Fukuhara), LETTER, 368  
three siblings with chronic progressive ophthalmoplegia and recurrent stroke-like illness (Matsuo et al), 158A

## Sturge-Weber syndrome

aspirin therapy for Sturge-Weber syndrome (Roach et al), 387A

## Subacute necrotizing encephalomyelopathy

similarity of brain CT appearance in spongy degeneration to that of subacute necrotizing encephalomyelopathy (Lo et al), 352

## Substantia innominata

dopaminergic and cholinergic lesions in progressive supranuclear palsy (Ruberg et al), 523

## Substantia nigra

the MPTP mouse: a model for exploring strategies to promote recovery of nigrostriatal dopaminergic neurons after injury? (Ricaurte et al), 117A

- status epilepticus in well-oxygenated rats causes neuronal necrosis (Nevander et al), 281
- Sudden infant death syndrome  
cerebral cortical function in infants at risk for sudden infant death syndrome (Clancy and Spitzer), 41
- Sympathetic nervous system  
attenuation of cold pressor test: evidence for decreased sympathetic tone in endurance-trained subjects (Appenzeller et al), 150A  
humoral changes in orthostatic hypotension with recurrent hypertension (Talman and Sved), 163A
- Sympathetic tone  
cardiovascular regulation and lesions of the central nervous system (Talman), *NEUROLOGICAL PROGRESS*, 1
- Takayasu arteritis  
Takayasu arteritis: a treatable cause of stroke in infancy (Kohman and Huttenlocher), 386A
- Tardive dyskinesia  
propranolol-induced tardive dyskinesia in a patient with akathisia (Sandyk), *LETTER*, 370
- T cells  
Japanese encephalitis: immunocytochemical studies of viral antigen and inflammatory cells in fatal cases (Johnson et al), 567  
neuropathy and anti-myelin-associated glycoprotein IgM M proteins: T cell regulation of M protein secretion in vitro (Latov et al), 182  
phenotypic and functional analysis of T cells cloned directly from the blood and cerebrospinal fluid of patients with multiple sclerosis (Hafler et al), 451  
serial immunological studies in multiple sclerosis patients treated systematically with human alpha interferon (Panitch et al), 434
- Temporal lobe  
language disturbances produced by electrical stimulation of the basal temporal region (Lüders et al), 151A  
temporal lobe asymmetry of electroencephalographic spectra in patients with memory loss (Vanderzant et al), 154A  
transient global amnesia: a case-control study (Kushner and Hauser), 684
- Thalamus  
status epilepticus in well-oxygenated rats causes neuronal necrosis (Nevander et al), 281  
transient global amnesia: a case-control study (Kushner and Hauser), 684
- Theiler's murine virus  
the role of proteolytic cleavage in Theiler's murine encephalomyelitis virus demyelinating disease (Nitayaphan et al), 133A  
Theiler's murine encephalomyelitis virus-induced demyelinating disease: correlation of disease incidence with specific H-2 region genes and with virus-specific cell-mediated immune responses (Clatch et al), 133A
- Thrombosis, cerebral  
thrombotic cerebral vasculopathy after herpes zoster infection (Eidelberg et al), 134A
- Thromboxane synthesis  
1-benzylimidazole inhibits thromboxane synthesis in experimental cerebral ischemia (Pettigrew et al), 125A
- Thymoma  
liver metastasis and myasthenia gravis twenty-two years after invasive thymoma (Rao et al), 162A
- Thyroid hormone  
thyroid hormone control of gene expression in Sprague-Dawley rat liver and brain (Stein), 385A
- Thyrotropin-releasing hormone  
the effects of TRH on F waves recorded from antagonistic muscles in human subjects (Delwaide and Schoenen), *LETTER*, 366  
preclinical drug screening: a model of a "clinical" autorefractory state with thyrotropin-releasing hormone but not with the more excitatory analogue DN-1417 (Beydoun et al), 150A  
randomized parallel placebo-controlled pilot study of intravenous thyrotropin-releasing hormone administration in amyotrophic lateral sclerosis patients: increased strength and functional ability (Brooks et al), 160A  
thyrotropin-releasing hormone enhances motor neuron-evoked contractions of cultured human muscle (Askanas et al), 716
- Tic  
clonidine's effects on autonomic nervous system function in patients with tic (Goetz et al), 139A
- Tissue culture  
tissue culture studies of neurofibromatosis: effects of axolemmal fragments and cyclic adenosine 3',5'-monophosphate analogues on proliferation of Schwann-like and fibroblast-like neurofibroma cells (Sobue et al), 68
- Todd's paralysis  
clinical features of postictal paralysis (Rolak), 152A
- Tomography, emission computed  
central cholinergic blockade by spiromustine studied by positron emission tomography (Staunton et al), 118A  
cerebral blood flow velocity as determined by Doppler is related to regional cerebral blood flow as determined by positron emission tomography (Perlman et al), 407A  
complex partial seizures: correlation of clinical and metabolic features (Holmes et al), 153A  
CT and PET findings after onset and resolution of Korsakoff's syndrome due to thalamic hemorrhage (Babikian et al), 128A  
dopaminergic pathways in humans studied by positron emission tomography (Martin et al), 118A  
leukoencephalopathy following intracarotid chemotherapy: neuropathology and positron emission tomography (Junck et al), 139A  
pathophysiology of Tourette syndrome: a positron emission tomographic and postmortem analysis (Singer et al), 416A  
PET imaging in sleeping normal and narcoleptic subjects (Spire et al), 147A  
positron emission tomographic measurement of blood-to-brain and blood-to-tumor transport of  $^{82}\text{Rb}$ : the effect of dexamethasone and whole-brain radiation therapy (Jarden et al), 636  
similarity of brain CT appearance in spongy degeneration to that of subacute necrotizing encephalomyelopathy (Lo et al), 352
- Tomography, x-ray computed  
acute traumatic midbrain hemorrhage (Ropper and Miller), 80  
cerebellar infarction: review of clinical findings and correlation with computed tomography and magnetic resonance imaging (Simmons et al), 125A  
clinical course and computed tomographic appearance of medically and surgically treated subdural hematoma (Bender), 127A  
computed tomography and the first seizure of adults (Gordon et al), 153A  
CT and PET findings after onset and resolution of Korsakoff's syndrome due to thalamic hemorrhage (Babikian et al), 128A  
focal cerebral infarction in the newborn: a distinct entity (Filipek et al), 406A

- Tomography, x-ray computed** (*continued*)  
 hypertensive encephalopathy: diffuse reversible white matter CT abnormalities (Fisher et al), NOTE, 268  
 Krabbe's disease—computed tomographic and magnetic resonance findings (Baram et al), 399A  
 Marchiafava-Bignami disease: computed tomographic scan and magnetic resonance imaging (Kawamura et al), LETTER, 103  
 metachromatic leukodystrophy manifesting as a schizophrenic disorder: computed tomographic correlation (Finelli), 94  
 reversible go—no go deficits in a case of frontal lobe tumor (Leimkuhler and Mesulam), 617  
 treatment of central nervous system sarcoidosis with radiotherapy (Bejar et al), 258
- Tourette's syndrome**  
 the effects of naloxone in Tourette's syndrome (Sandyk), LETTER, 367  
 the natural history of Tourette's syndrome (Erenberg et al), 386A  
 pathophysiology of Tourette syndrome: a positron emission tomographic and postmortem analysis (Singer et al), 416A
- Toxicity, neurological**  
 differential neurotoxicity of four major anticonvulsants (Smith et al), 119A
- Transplantation, experimental neuronal**  
 transplantation of human neurons and adrenal chromaffin cells into rodent brain (Kim et al), 117A
- Tremor, essential**  
 efficacy of primidone in essential tremor (Koller), 137A  
 treatment of essential tremor—further comment (Young), LETTER, 368; reply (Koller), LETTER, 369
- Trigeminal neuralgia**  
 percutaneous balloon gangliolysis for trigeminal neuralgia (Mullan and Lichtor), 156A
- Trihexyphenidyl pharmacokinetics**  
 pharmacokinetics of trihexyphenidyl after short-term and long-term administration to dystonic patients (Burke and Fahn), 35
- Tropomyosin**  
 heterogeneity of human skeletal muscle tropomyosin (Giometti and Danon), 234
- Trypanosoma cruzi***  
 neuropathy associated with experimental Chagas' disease (Said et al), 676
- Tubuloreticular inclusions**  
 new ultrastructural changes in white blood cells and brain in Reye's syndrome (Murphy et al), 398A
- Twins, monozygotic**  
 monozygotic twins with Parkinson's disease (Koller et al), 136A
- Tyrosine**  
 an unusual movement disorder associated with tyrosinosis and elevated cerebrospinal fluid catecholamines (Rust et al), 399A
- Valproic acid**  
 false-positive free erythrocyte protoporphyrin from valproic acid (Crosley et al), 413A  
 valproic acid: supratherapeutic levels (Hurst), 378A
- Vasoactive drugs**  
 vasoactive drugs produce selective changes in flow to experimental brain tumors (Panther et al), 712
- Vasopressin**  
 vasopressin in postmortem Alzheimer brain (Mazurek et al), 143A
- Ventricles**  
 cardiac dysfunction during status epilepticus in the neonatal pig (Young et al), 291  
 cerebral ventricular enlargement as a biological marker of schizophrenia (LeWitt et al), 147A
- Ventriculostomy**  
 treatment of neonatal intraventricular hemorrhage with hydrocephalus by ventriculostomy (Newman et al), 408A
- Vesicourethral junction**  
 cerebral potentials evoked by stimulation of vesicourethral junction (Sarica et al), 154A
- Vision loss**  
 vitamin E deficiency associated with vision loss and bulbar weakness (Larsen et al), 725
- Vitamin E deficiency**  
 vitamin E deficiency associated with vision loss and bulbar weakness (Larsen et al), 725
- Warfarin**  
 a multicenter survey of anticoagulation parameters when using heparin and warfarin (Alberts and Massey), 126A
- Waveforms**  
 a three-dimensional view of electrophysiological waveforms (Towle et al), 151A
- Wernicke-Korsakoff syndrome**  
 reversibility of cerebral hypoperfusion and brain atrophy in Wernicke-Korsakoff syndrome (Meyer et al), 142A
- Wernicke's area**  
 comprehension deficits produced by stimulation of Wernicke's area in candidates for temporal lobectomy (Lesser et al), 118A
- Whiplash injuries**  
 a proposed mechanism of intraocular hemorrhages in infant whiplash-shake injuries (Woody et al), 387A
- Whipple's disease**  
 oculomasticatory myorhythmia: a sign of Whipple's disease (Schwartz et al), 135A
- White blood cells**  
 new ultrastructural changes in white blood cells and brain in Reye's syndrome (Murphy et al), 398A
- White matter**  
 hypertensive encephalopathy: diffuse reversible white matter CT abnormalities (Fisher et al), NOTE, 268
- Xanthomatosis, cerebrotendinous**  
 treatment of cerebrotendinous xanthomatosis with chenodeoxycholic acid (Pedley et al), 517
- X chromosome**  
 lethal cardiomyopathy and central nervous system involvement in a family with X-linked muscular dystrophy (Bergia et al), 402A
- Zoonoses**  
 an evaluation of a zoonotic hypothesis for a slow viral infection (Davanipour et al), 134A
